B. Submitting Comments

Please include Docket ID NRC–2017–0215 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at http://www.regulations.gov as well as enter the comment submissions into ADAMS. The NRC does not routinely edit submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment submission into ADAMS.

II. Discussion

On November 7, 2017, the NRC solicited comments on its draft licensing guidance entitled "Yttrium-90 (Y-90) Microsphere Brachytherapy Sources and Devices TheraSphere® and SIR-Spheres® Licensing Guidance." This draft would be revision 10 to this licensing guidance. The licensing guidance for Y-90 microsphere brachytherapy was initially published in October 2002 and subsequently revised in 2004, 2007, 2008, 2011, 2012, and 2016. Following years of using the current licensing guidance, the NRC staff, stakeholders, and the Advisory Committee on the Medical Uses of Isotopes identified numerous issues that need to be addressed. A working group composed of Agreement State representatives and NRC staff was formed to address identified issues. This draft licensing guidance for Y-90 microsphere brachytherapy has been revised to update criteria for training and experience, medical event reporting, inventory requirement specifications, and waste disposal issues. The draft guidance provides new information regarding cremation and autopsy. The public comment period was originally scheduled to close on January 8, 2018. The NRC has decided to extend the public comment period on this document until February 8, 2018, to allow more time for members of the public to submit their comments.

Dated at Rockville, Maryland, this 27th day of December 2017.

For the Nuclear Regulatory Commission. **Kevin Williams.**

Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Notice of Consideration of Issuance of Amendments to Facility Operating Licenses and Combined Licenses and Proposed No Significant Hazards Consideration Determination

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in § 50.92 of title 10 of the Code of Federal Regulations (10 CFR), this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated, or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be
