SUPPLEMENTARY INFORMATION: The subject amendment to Permit No. 21158-01 is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*) and the regulations governing the taking and importing of marine mammals (50 CFR part 216).

Permit No. 21158, issued on September 25, 2017 (82 FR 48985; October 23, 2017), authorizes the permit holder to continue long-term studies of the Erebus Bay, Antarctica, Weddell seal (*Leptonychotes weddellii*) population to evaluate how temporal variation in the marine environment affects individual life histories and the population dynamics of long-lived mammal. The permit holder is requesting the permit be amended to increase take numbers for Weddell seals due to a population boom observed by their long-term research. We issued a major amendment on (83 FR 7166; February 20, 2018) to increase take for the 2017-18 field season to allow researchers to continue their work, increasing take of pups from 675 to 1,000 for one field season only. However, due to the population boom, the permit holder is requesting an increase of take by 35 percent to all life stages. The amendment would increase: Pups tagged from 515 to 800, pups retagged due to lost tags from 10 to 20, tagging adults from 285 to 385, adults harassed for tag reading from 1325 to 1800, and number of pups harassed from tag reading from 675 to 910, annually. The permit holder would also like to increase the number of carcasses salvaged from 10 to 35. The permit expires on September 30, 2022.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: April 11, 2018.

Magnuson-Stevens Act Provisions; General Provisions for Domestic Fisheries; Application for Exempted Fishing Permits

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for comments.

SUMMARY: The Acting Assistant Regional Administrator for Sustainable Fisheries, Greater Atlantic Region, NMFS, has made a preliminary determination that Exempted Fishing Permits, to facilitate the use of fishing year 2018 monkfish research set-aside days-at-sea, warrants further consideration. This notice provides interested parties the opportunity to comment on the proposed Exempted Fishing Permits.

DATES: Comments must be received on or before May 1, 2018.

ADDRESSES: You may submit written comments by any of the following methods:

- *Email:* NMFS.GAR.EFP@noaa.gov. Include in the subject line "Comments on 2018 Monkfish RSA EFP."
- *Mail:* Michael Pentony, Regional Administrator, NMFS, Greater Atlantic Regional Office, 55 Great Republic Drive, Gloucester, MA 01930. Mark the outside of the envelope "Comments on 2018 Monkfish RSA EFP."

FOR FURTHER INFORMATION CONTACT: Cynthia Hanson, Fishery Management Specialist, 978-281-9180, Cynthia.Hanson@noaa.gov.

SUPPLEMENTARY INFORMATION:

Exempted Fishing Permits (EFPs) that waive monkfish landing limits have been routinely approved since 2007 to increase operational efficiency and optimize research funds generated from the Monkfish Research Set-Aside (RSA)

Program. These EFPs would facilitate compensation fishing in support of the projects funded under the 2018 monkfish RSA competition. Project proposals for this year are currently under review, with selection expected in late April, just prior to the May 1 start of the 2018 fishing year. Consistent with previous years of the monkfish RSA program, these RSA compensation fishing EFPs would authorize an exemption for participating vessels from days-at-sea (DAS) landing limit restrictions in the Monkfish Northern and Southern Fishery DAS would be allowed to harvest monkfish in excess of the usual landing limits associated with their Federal permits.

The monkfish RSA program is allocated 500 monkfish RSA DAS annually, as established by the New England and Mid-Atlantic Fishery Management Councils in Amendment 2 to the Monkfish FMP (70 FR 21929; April 28, 2005). Each year, these monkfish RSA DAS may be divided between research award recipients and sold to fishermen to fund approved monkfish research projects. Award recipients receive an allocation of RSA DAS and a maximum amount that may be landed under available DAS. Projects are constrained to the total DAS, maximum available landing weight, or award timetable, whichever is reached first. To calculate a maximum weight allocation that is similar to the Councils' original intent to be harvested under the allocated 500 RSA DAS, NMFS uses twice the landing limit for Permit Category A and C monkfish vessel fishing in the Southern Fishery Management Area (4,074 lb (2 mt) whole weight) for each RSA DAS. This means that annually, a maximum of 2,037,000 lb (924 mt) of whole weight may be harvested across all Monkfish RSA projects. Allowing vessels an exemption from monkfish landing limits provides an incentive for vessels to purchase and fish under RSA DAS to catch more monkfish per trip, while constraining each project to a maximum available harvest limit ensures that the overall monkfish RSA catch will not be an excessive burden on the fishery as a whole.

If approved, the applicants may request minor modifications and extensions to the EFP throughout the year. EFP modifications and extensions may be granted without further notice if they are deemed essential to facilitate completion of the proposed research and have minimal impacts that do not change the scope of the initially approved EFP request. Any fishing activity conducted outside the scope of

the exempted fishing activity would be prohibited.
