Note 1: For the purposes of this AD, a detailed inspection is: “An intensive examination of a specific item, installation, or assembly to detect damage, failure, or irregularity. Available lighting is normally supplemented with a direct source of good lighting at an intensity deemed appropriate. Inspection aids such as mirror, magnifying lenses, etc., may be necessary. Surface cleaning and elaborate procedures may be required.”

Terminating Action

(g) The repetitive inspections required by this AD may be terminated if all ballasts installed on the airplane have part number (P/N) BR9000–21, installed in accordance with the Accomplishment Instructions of Bombardier Service Bulletin 8–33–51, Revision ‘A,’ dated April 20, 2005 (to replace ballast P/N BA08006–1), or 8–33–52, dated April 15, 2005 (to replace ballast P/N BA08006–28–1). Ballasts installed before the effective date of this AD are also acceptable if done in accordance with Bombardier Service Bulletin 8–33–51, dated August 16, 2002.

Parts Installation

(h) As of the effective date of this AD: No person may install a ballast P/N BA08006–1 or BA08006–28–1 on any airplane.

Alternative Methods of Compliance (AMOCs)

(i)(1) The Manager, New York Aircraft Certification Office, FAA, has the authority to approve AMOCs for this AD, if requested in accordance with the procedures found in 14 CFR 39.19.

(2) Before using any AMOC approved in accordance with § 39.19 on any airplane to which the AMOC applies, notify the appropriate principal inspector in the FAA Flight Standards Certificate Holding District Office.

Environmental Protection Research Fellowships and Special Research Consultants for Environmental Protection

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The EPA is taking direct final action on the implementation of the EPA’s statutory authority in Title II of the Interior, Environment, and Related Agencies Appropriations Act of 2006 (Pub. L. 109–54) that will allow the EPA to establish fellowships in environmental protection research, appoint fellows to conduct this research, and appoint special research consultants to advise on environmental protection research. Under an administrative provision of Public Law 109–54, the Administrator may, after consultation with the Office of

Personnel Management, make up to five (5) appointments in any fiscal year from 2006 to 2011 for the Office of Research and Development. Appointees under this authority shall be employees of the EPA and will engage in activities related to scientific and engineering research that support EPA’s mission to protect the environment and human health.

In the “Rules and Regulations” section of the **Federal Register**, we are approving implementation of the EPA’s statutory authority (to establish fellowships in environmental protection research and appoint fellows to conduct this research and appoint special research consultants to advise on environmental protection research) in Title II of the Interior, Environment and Related Agencies Appropriations Act of 2006 (Pub. L. 109–54) with 42 U.S.C. 209 as a direct final rule without prior proposal because we view this as a non-controversial revision and anticipate no adverse comment. We have explained our reasons for this approval in the preamble to the direct final rule. If we receive no adverse comment, no further action on this proposed rule will be taken. If we receive adverse comment, we will withdraw the direct final rule and it will not take effect. We will address all public comments in a subsequent final rule based on this proposed rule. We will not institute a second comment period on this action. Any parties interested in commenting must do so at this time.

DATES: Comments on this proposed rule must be received by May 4, 2006.

Criteria for the Safe and Environmentally Protective Use of Granular Mine Tailings Known as "Chat"

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA or Agency) is proposing mandatory criteria for the environmentally protective use of chat for transportation construction projects carried out in whole or in part with Federal funds, and a certification requirement. Chat used in transportation projects must be encapsulated in hot mix asphalt concrete or Portland cement concrete unless the use of chat is otherwise authorized by a State or Federal response action undertaken pursuant to applicable Federal or State environmental laws. Such response actions are undertaken with consideration of risk assessments developed in accordance with State and Federal laws, regulations, and guidance. EPA is also proposing to establish recommended criteria as guidance on the environmentally protective use of chat for non-transportation cement and concrete projects. The chat covered by this proposal is from the lead and zinc mining area of Oklahoma, Kansas and Missouri, known as the Tri-State Mining District.
