Establishment of Class E Airspace; Jersey Shores Airport, PA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to establish Class E airspace at Jersey Shores Airport (P96), Jersey Shores, Pennsylvania. The development of an Area Navigation (RNAV) Standard Instrument Approach Procedure (SIAP) and Helicopter RNAV (GPS) 074 approach for the Jersey Shores Airport to serve flights operating into the airport during Instrument Flight Rules (IFR) conditions makes this action necessary. executing an approach. The area would be depicted on aeronautical charts for pilot reference.

The Proposal

The FAA is considering an amendment of part 71 of the Federal Aviation Regulations (14 CFR part 71) to establish Class E airspace at Jersey Shores, PA. The development of SIAPs to serve flights operating into the airport during IFR conditions makes this action necessary. Controlled airspace extending upward from 700 feet AGL is needed to accommodate the SIAPs. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface are published in Paragraph 6005 of FAA Order 7400.9N, dated September 1, 2005, and effective September 16, 2005, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation, (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that would only affect air traffic procedures and air navigation, it is certified that this proposed rule would not have significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
