**SUPPLEMENTARY INFORMATION:** Section 101(c) of the Federal Mine Safety and Health Act of 1977 and Title 30 of the Code of Federal Regulations Part 44 govern the application, processing, and disposition of petitions for modification.

#### I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor (Secretary) determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. That the application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, the regulations at 30 CFR 44.10 and 44.11 establish the requirements and procedures for filing petitions for modification.

#### II. Petitions for Modification

*Docket Number:* M-2018-006-C.

*Petitioner:* Wolf Run Mining LLC, 21550 Barbour County Highway, Philippi, West Virginia 26416.

*Mine:* Sentinel Mine, MSHA I.D. No. 46-04168, located in Barbour County, West Virginia.

*Regulation Affected:* 30 CFR 75.500(d) (Permissible electric equipment).

*Modification Request:* The petitioner requests a modification of the existing standard to permit an alternative method of compliance to allow the use of nonpermissible electronic low-voltage or battery-powered nonpermissible electronic hand-held drill equipment in or inby the last open crosscut.

The petitioner states that:

(1) Nonpermissible electronic low-voltage or battery-powered nonpermissible electronic equipment will be limited to hand-held drill equipment.

(2) All other hand-held drill equipment used in or inby the last open crosscut will be permissible.

(3) Other hand-held drill equipment may be used if approved in advance by the MSHA District Manager.

(4) All nonpermissible low-voltage or battery-powered nonpermissible hand-held equipment to be used in or inby the last open crosscut will be examined prior to use by a certified person to ensure the equipment is being maintained in a safe operating condition.

(5) The results of the examinations will be recorded and retained for one year and made available to MSHA on request.

(6) A qualified person, as defined in 30 CFR 75.151, will continuously monitor for methane immediately before and during the use of nonpermissible hand-held drill equipment in or inby the last open crosscut.

(7) Nonpermissible hand-held drill equipment will not be used if methane is detected in concentrations at or above 1.0 percent. When methane is detected at such level while the nonpermissible hand-held drill equipment is being used, the equipment will be deenergized immediately and withdrawn outby the last open crosscut.

(8) All hand-held methane detectors will be MSHA-approved and maintained in permissible and proper operating condition as defined in 30 CFR 75.320.

(9) Coal production will cease in the entry or crosscut where the nonpermissible hand-held drill equipment is in use. Accumulations of coal and combustible materials referenced in 30 CFR 75.400 will be removed before drilling begins to provide additional safety to miners.

(10) Nonpermissible electronic hand-held drill equipment will not be used when float coal dust is in suspension.

(11) All hand-held drill equipment will be used in accordance with the manufacturer's recommended safe use procedures.

(12) Qualified personnel who use nonpermissible hand-held drill equipment will be properly trained to recognize the hazards and limitations associated with use of such equipment in areas where methane could be present.

(13) The nonpermissible electronic hand-held drill equipment will not be put into service until MSHA has initially inspected the equipment and determined that it is in compliance with all of the above terms and conditions.

(14) Cables supplying power to low-voltage hand-held drill equipment will only be used when permissible hand-held drill equipment is not available.
