

**SUPPLEMENTARY INFORMATION:****I. Abstract**

National Marine Fisheries Service (NMFS) Southeast Region manages the U.S. fisheries of the Exclusive Economic Zone (EEZ) off the South Atlantic, Caribbean, and Gulf of Mexico under the Fishery Management Plans (FMP) for each Region. The Regional Fishery Management Councils prepared the FMPs pursuant to the Magnuson-Stevens Fishery Conservation and Management Act. The regulations implementing the FMPs are at 50 CFR part 622.

The recordkeeping and reporting requirements at 50 CFR part 622 form the basis for this collection of information. NMFS Southeast Region requests information from fishery participants. This information, upon receipt, results in an increasingly more efficient and accurate database for management and monitoring of the fisheries of the EEZ off the South Atlantic, Caribbean, and Gulf of Mexico.

**II. Method of Collection**

Paper applications, electronic reports, and telephone calls are required from participants, and methods of submittal include Internet and facsimile transmission of paper forms.

**III. Data**

*OMB Number:* 0648-0205.

*Form Number:* None.

*Type of Review:* Regular submission.

*Affected Public:* Business or other for-profit organizations.

*Estimated Number of Respondents:* 16,820.

*Estimated Time per Response:* 1 hour and 24 minutes.

*Estimated Total Annual Burden Hours:* 24,121.

*Estimated Total Annual Cost to Public:* \$2,887,000.

**IV. Request for Comments**

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or

included in the request for OMB approval of this information collection; they also will become a matter of public record.

**SUPPLEMENTARY INFORMATION:****I. Abstract**

The economic census, conducted under the authority of Title 13, United States Code (U.S.C.), is the primary source of facts about the structure and functioning of the Nation's economy.

Economic statistics serve as part of the framework for the national accounts and provide essential information for government, business, and the general public. Economic data are the Census Bureau's primary program commitment during nondecennial census years. The 2007 Economic Census covering the Information; Professional, Scientific, and Technical Services; Management of Companies and Enterprises; Administrative and Support and Waste Management and Remediation Services; Educational Services; Health Care and Social Assistance; Arts, Entertainment, and Recreation; and Other Services (Except Public Administration) sectors (as defined by the North American Industry Classification System (NAICS)) will measure the economic activity of 2.9 million establishments. The information collected will produce basic statistics by kind of business on the number of establishments, receipts/revenue, expenses, payroll, and employment. It will also yield a variety of subject statistics, including receipts/revenue by product line, receipts/revenue by class of customer, and other industry-specific measures. Primary strategies for reducing burden in Census Bureau economic data collections are to increase reporting through standardized questionnaires and broader electronic data collection methods.

**II. Method of Collection***Mail Selection Procedures*

Establishments for the mail canvass will be selected from the Census Bureau's Business Register. To be eligible for selection, an establishment will be required to satisfy the following conditions: (i) It must be classified in the information; professional, scientific, and technical services; management of companies and enterprises; administrative and support and waste management and remediation services; educational services; health care and social assistance; arts, entertainment, and recreation; or other services (except public administration) sector; (ii) it must be an active operating establishment of a multi-establishment firm (*i.e.*, a firm that operates at more than one physical location), or it must be a single-establishment firm with payroll (*i.e.*, a firm that operates at only one physical location); and (iii) it must be located in one of the 50 states or the District of Columbia. Mail selection procedures will distinguish the following groups of establishments:

### 1. Establishments of Multi-Establishment Firms

Selection procedures will assign all active operating establishments of multi-establishing firms to the mail component of the potential respondent universe. We estimate that the 2007 Economic Census mail canvasses will include approximately 467,000 establishments of multi-establishment firms.

### 2. Single-Establishment Firms With Payroll

As an initial step in the selection process, we will conduct a study of the potential respondent universe. This study will produce a set of industry-specific payroll cutoffs that we will use to distinguish large versus small single-establishment firms within each industry or kind of business. This payroll size distinction will affect selection as follows:

#### a. Large Single-Establishment Firms

Selection procedures will assign single-establishment firms having annualized payroll (from Federal administrative records) that equals or exceeds the cutoff for their industry to the mail component of the potential respondent universe. We estimate that the 2007 Economic Census mail canvasses will include approximately 769,000 large single-establishment firms.

#### b. Small Single-Establishment Firms

Selection procedures also will assign a sample of single-establishment firms having annualized payroll below the cutoff for their industry to the mail component of the potential respondent universe. Sampling strata and corresponding probabilities of selection will be determined by a study of the potential respondent universe conducted shortly before mail selection operations begin. We estimate that the 2007 Economic Census mail canvasses will include approximately 79,000 small single-establishment firms selected in this sample.

All remaining single-establishment firms with payroll will be represented in the census by data from Federal administrative records. Generally, we will not include these small employers in the census mail canvass. However, administrative records sometimes have fundamental industry classification deficiencies that make them unsuitable for use in producing detailed industry statistics by geographic area. When we find such a deficiency, we will mail the firm a census classification form to collect basic information needed to resolve the problem. We estimate that

the 2007 Economic Census mail canvasses for the sectors covered by this submission will include approximately 472,000 small single-establishment firms that receive these classification forms.
