

water and waste facilities in rural areas. In addition to providing loans and loan guarantees, one of RUS' main objectives is to safeguard loan security until the loan is repaid.

This collection of information previously covered RUS Form 479, "Financial and Statistical Report for Telecommunications Borrowers." The data collected on the Form 479 is known as Operating Report data. The agency has developed the USDA Data Collection System which is an electronic system for collecting Operating Report Data for Electric, Telecommunications, and Broadband borrowers. As the agency is moving from a form-based collection to an electronic system for data collection, the name of this information collection will be revised to Operating Reports for Telecommunications and Broadband Borrowers. The purposes for collecting the data remain unchanged, which is to provide RUS with vital financial information needed to ensure the maintenance of the security for the Government's loans; and statistical data which enables RUS to ensure the provision of quality telecommunications and broadband service as mandated by the Rural Electrification Act (RE Act) of 1936. The primary purpose of the RUS Form 479 was to provide RUS with financial information to ensure loan security consistent with due diligence. Secondary to this purpose was the use of the form for a variety of financial and statistical based studies performed throughout the year. These functions are essential to protect loan security and to achieve objectives of the RE Act. New to this collection is the requirement for Broadband Borrowers to submit Operating Report Data. Both the Operating Report for Telecommunications Borrowers and the Operating Report for Broadband Borrowers are required by the loan contract and provide RUS with vital financial information needed to ensure the maintenance of the security for the Government's loans and service data which enables RUS to ensure the provision of quality telecommunications and broadband service as mandated by the RE Act of 1936.

Also added to this collection is the use of a new RUS Form 674, "Certificate of Authority to Submit or Grant Access to Data." This form has been developed for use in collecting information that will allow RUS Electric, Telecommunications, and Broadband program borrowers to file electronic Operating Reports with the agency using the new USDA Data Collection System. RUS Form 674, accompanied by a Board Resolution, will identify the name and

USDA eAuthentication ID for a certifier and security administrator that will have access to the USDA Data Collection System for purposes of filing electronic Operating Reports.
