

numbers of age-0 LCR steelhead in 2017. The researchers do not propose to kill any fish but a small number may die as an unintended result of research activities.

Permit 21837

Researchers at the Oregon State University are requesting a permit that would allow them to take juvenile and adult UWR Chinook salmon and UWR steelhead. The research permit would expire on December 31, 2022. The researchers propose to work in the upper Willamette River (Oregon) and its tributaries including the Middle Fork Willamette, Coast Fork Willamette, Calapooia, Long Tom, Marys, and Luckiamute Rivers. The purpose of their research is to describe how water temperature and the presence of coldwater refugia influence the behavior, growth, diet, body condition, seasonal movements, and habitat associations of coastal cutthroat trout. The research would provide information to help fisheries managers prioritize conservation and management efforts in the context of climate change. The research would benefit UWR Chinook salmon and UWR steelhead by providing information on how a salmonids with similar ecological requirements—coastal cutthroat trout—adapt to increasing water temperatures. This new information would help fisheries managers prioritize conservation and management efforts in the context of climate change.

The researchers propose to capture fish using boat and backpack electrofishing, stick and beach seining, and angling. The researchers would identify fish immediately after capture and hold them in cool, aerated buckets. The researchers propose to hold ESA-listed fish only long enough to avoid recapturing them. They would release the fish to the site of capture, with no further handling or measurements, as soon as they complete sampling at a site. The researchers propose the following measures to minimize take of adult UWR Chinook and UWR steelhead for each sampling date: (1) Request current information from the Oregon Department of Fish and Wildlife on adult run timing and distribution, (2) conduct visual reconnaissance surveys before sampling each site, and (3) avoid sampling in areas where adult salmonids are likely to hold, such as pools, glides, and tributary junctions. If researchers observe adult salmon or steelhead, the researchers would immediately stop sampling and leave the site. The researchers would not seine a single site more than five times or electrofish a single site more than

three times across the summer sampling season. The researchers do not propose to kill any fish but a small number of juveniles may die as an unintended result of research activities.

Permit 22069

The Oregon Department of Fish and Wildlife (ODFW) is requesting a permit that would allow them to take OC coho in the Tillamook Bay (Oregon). The research permit would expire on December 31, 2022. ODFW proposes to conduct a radio telemetry study of OC fall-run Chinook salmon, which are not ESA-listed. Researchers may unintentionally take OC coho salmon while collecting Chinook salmon. The goal of the research study is to improve information on the distribution and abundance of Chinook spawners in the Tillamook basin. The OC Chinook salmon ESU is subject to management under the Pacific Salmon Treaty, which calls for use of abundance-based management. Information on the distribution of spawning OC Chinook in the Tillamook basin is essential for developing an efficient and cost effective program to monitor Chinook spawner abundance. In addition, this research would benefit ESA-listed salmonids by demonstrating and improving methods for capturing and tagging fish in a large bay setting, and tracking spawner movement into multiple geographic strata.

The ODFW proposes to capture fish from August through December in the lower portion of Tillamook Bay, below the mouths of the five primary Chinook spawning streams that flow into the bay. ODFW proposes to capture juvenile and adult OC coho using angling, seines, and tangle nets. The nets would have a nylon mesh size of 4.5 inches and range from 75 to 150 feet in length and 8 to 20 feet in depth, dependent upon water levels and sampling conditions. To minimize stress and injury of fish captured using tangle nets, the researchers propose to: (1) Observe nets constantly during deployment, (2) remove fish immediately upon detection of capture (*i.e.*, typically less than two minutes after entanglement), and (3) relocate tangle nets if a coho is captured or if any fish is recaptured on the same day. ODFW proposes to identify fish upon capture, and immediately release any coho salmon without further handling. The researchers do not propose to kill any fish but a small number may die as an unintended result of the activities.

This notice is provided pursuant to section 10(c) of the ESA. NMFS will evaluate the applications, associated documents, and comments submitted to

determine whether the applications meet the requirements of section 10(a) of the ESA and Federal regulations. The final permit decisions will not be made until after the end of the 30-day comment period. NMFS will publish notice of its final action in the **Federal Register**.

BUREAU OF CONSUMER FINANCIAL PROTECTION

[Docket No: CFPB-2018-0021]

Privacy Act of 1974; System of Records

AGENCY: Bureau of Consumer Financial Protection.

ACTION: Rescindment of a System of Records Notice.

SUMMARY: In accordance with the Privacy Act of 1974, as amended, the Bureau of Consumer Financial Protection (Bureau) provides notice that it is rescinding CFPB.012 Interstate Land Sales Registration Files from its inventory of record systems.

The Interstate Land Sales Registration Program (ILS Program) was developed as required by Interstate Land Sales Full Disclosure Act of 1968. Originally, the Department of Housing and Urban Development (HUD) maintained the ILS Program; ownership of this program transferred from HUD to the Bureau as required by the Dodd-Frank Wall Street Reform and Consumer Protection Act. The ILS Program maintains information submitted by developers of land or other individuals offering 25 or more lots for sale and using any means or instruments of interstate commerce (including the mails) in promoting or selling properties pursuant to the requirements of the Interstate Land Sales Full Disclosure Act, and in the administration and management of the Interstate Land Sales Registration Program.

The Bureau is rescinding this System of Records Notice because the ILS Program collects no individual identifiers on which searches are conducted, thereby making a System of Records Notice unnecessary.

DATES: Comments must be received no later than June 18, 2018. This Rescindment will be effective upon publication in today's **Federal Register**. The Bureau will continue to operate the ILS Program in its current form, which does not require a System of Records Notice.

ADDRESSES: You may submit comments, identified by the title and docket number (see above), by any of the following methods:

- *Electronic:* privacy@cfpb.gov or <http://www.regulations.gov>. Follow the instructions for submitting comments.
- *Mail:* Claire Stapleton, Chief Privacy Officer, Bureau of Consumer Financial Protection, 1700 G Street NW, Washington, DC 20552.
- *Hand Delivery/Courier:* Claire Stapleton, Chief Privacy Officer, Bureau of Consumer Financial Protection, 1700 G Street NW, Washington, DC 20552.

Comments will be available for public inspection and copying at 1700 G Street NW, Washington, DC 20552, on official business days between the hours of 10 a.m. and 5 p.m. Eastern Time. You can make an appointment to inspect comments by telephoning (202) 435-7220. All comments, including attachments and other supporting materials, will become part of the public record and subject to public disclosure. You should submit only information that you wish to make available publicly.

FOR FURTHER INFORMATION CONTACT: Claire Stapleton, Chief Privacy Officer, at (202) 435-7220. If you require this document in an alternative electronic format, please contact CFPB_Accessibility@cfpb.gov.

SUPPLEMENTARY INFORMATION: The files for the ILS Program are organized and searchable only by business and parcel information. While the ILS Program also contains certain kinds of personally identifiable information, it does not collect individual identifiers on which searches are conducted and there is no accompanying file or process to cross-reference this kind of information to an individual. The ILS Program, therefore, does not require a System of Records Notice and the rescindment of such of notice would likely have little effect on the privacy of individuals whose information was maintained in the system of records. Rescindment of this System of Records Notice will also promote the overall streamlining and management of the CFPB Privacy Act record systems.

BUREAU OF CONSUMER FINANCIAL PROTECTION

[Docket No: CFPB-2018-0019]

Privacy Act of 1974; System of Records

AGENCY: Bureau of Consumer Financial Protection.

ACTION: Rescindment of a System of Records Notice.

SUMMARY: In accordance with the Privacy Act of 1974, as amended, the Bureau of Consumer Financial Protection (Bureau) provides notice that it is rescinding CFPB.024 Judicial and Administrative Filings Collection from its inventory of record systems.

The System of Records Notice was intended to address a potential collection of publicly available personally identifiable information contained in formal judicial and administrative filings, or other formal actions that have reached final judgment, involving financial frauds against consumers. The collection would have been used in identifying repeat offenders and prosecuting cases based on these types of frauds, and access to the records would have been limited to State and Federal agencies for law enforcement purposes.

The Bureau is rescinding this System of Records Notice because it never created this system and no information or documents were ever collected, thereby making the System of Records Notice unnecessary.

DATES: Comments must be received no later than June 18, 2018. This Rescindment will be effective upon publication in today's **Federal Register**.
