SUPPLEMENTARY INFORMATION:

I. Background

Under FDA's current regulations governing the conduct of *in vitro* diagnostic (IVD) studies, the definition of human subject includes human specimens (see 21 CFR 812.3(p)). Because these regulations require informed consent for all FDA-regulated human subject research, except in limited circumstances specified in FDA regulations, informed consent is required before specimens can be used in FDA-regulated research (see 21 CFR part 50). This aspect of FDA's human subject protection regulations has created confusion and difficulty for persons developing IVDs. Many clinicians, research hospitals, and companies have viewed the requirement for informed consent for IVD studies using leftover specimens to be unnecessary to protect human subjects and to be overly burdensome and costly.

FDA has recently focused on unnecessary obstacles to medical product development. The agency has received comments from trade associations and research institutions that identify the challenge of obtaining informed consent for the use of leftover specimens as an unnecessary obstacle and expense to investigational efforts.

When leftover specimens are available, it is often difficult, if not impossible, to locate the donor and obtain consent.

The confusion regarding the application of informed consent requirements to IVD studies and concerns about unnecessary obstacles to product development have prompted FDA to issue this guidance document. The agency believes that the policy expressed in this guidance will facilitate product development in a manner consistent with values of human subject protection.

FDA intends that the exercise of enforcement discretion expressed in this guidance document begin immediately. In accordance with FDA's GGP regulation (21 CFR 10.115), you may comment on this guidance at any time. The agency will consider your comments and determine whether to revise the guidance at a later date.

II. Significance of Guidance

This guidance is being issued consistent with FDA's GGP regulation. The guidance represents the agency's current thinking on this topic. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statute and regulations.

III. Electronic Access

To receive "Guidance on Informed Consent for *In Vitro* Diagnostic Device Studies Using Leftover Human Specimens That Are Not Individually Identifiable" by fax, call the CDRH Facts-On-Demand system at 800-899-0381 or 301-827-0111 from a touch-tone telephone.
