Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Beryllium Rocket Motor Fuel Firing were promulgated on April 6, 1973, and amended on both October 17, 2000 and February 27, 2014. The 2014 amendment promulgated technical and editorial corrections for source testing of emissions and operations. These regulations apply to existing and new building, structure, facility, or installation where the static test firing of a beryllium rocket motor and/or the disposal of beryllium propellant is conducted. New facilities include those that commenced construction or reconstruction after the date of promulgation. Owners and operators of affected facilities are required to comply with reporting and recordkeeping requirements for the General Provisions (40 CFR part 60, subpart A), as well as the specific requirements at 40 CFR part 61, subpart D. Owners or operators of the affected facilities must submit a one-time only report of any physical or operational changes, initial performance tests, and periodic reports and results.
