#### **DEPARTMENT OF THE INTERIOR**

#### **Bureau of Reclamation**

### Information Collection Activities; Proposed Collection; Comment Request

**AGENCY:** Bureau of Reclamation, Interior.

**ACTION:** Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces that the Bureau of Reclamation (Reclamation) intends to seek approval of the following proposed new information collection: Recreation Survey, New Melones Lake Project, Sonora, CA. Before submitting the information collection request to the Office of Management and Budget for approval, Reclamation is soliciting comments on specific aspects of the information collection.

**DATES:** Comments on this notice must be received by July 3, 2006.

ADDRESSES: Address all comments concerning this information collection to Bureau of Reclamation, Central California Area Office, 7794 Folsom Dam Road, Folsom, CA 95630.

**FOR FURTHER INFORMATION CONTACT:** For further information or a copy of the proposed collection of information form, contact Ms. Elizabeth Ayres, Bureau of Reclamation, telephone 916–989–7192, or at the address above.

SLIPPI EMENTARY INFORMATION: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of Reclamation's functions, including whether the information will have practical use; (b) the accuracy of Reclamation's estimated time and cost burdens of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, use, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including increased use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

Title: Recreation Survey, New Melones Lake Project, Sonora, CA. Abstract: The purpose of the on-site recreation survey is to characterize existing users, characterize their use of the New Melones Project, assess their satisfaction with their experience and the facilities, and find out what other opportunities or facilities they would like to see developed at the New Melones Lake Project. The purpose of the regional telephone survey is to characterize regional population, their outdoor recreation use, the demand for various types of outdoor recreation activities, trends in outdoor recreation use, and the extent to which regional population use New Melones Lake Project, Sonora, CA. Together the on-site survey and the regional telephone survey shall describe the recreational preferences of visitors to the New Melones Lake Project and provide guidance on what recreational planning objectives should be included in the New Melones Lake Project RMP/EIS.

Description of respondents: Persons who recreate at New Melones Lake Project and the areas surrounding New Melones Lake Project, and residents in Sonora and Tuolumne counties.

Frequency: This is a one-time voluntary survey.

Estimated Total Number of Respondents: 1,500.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 375 hours.

### ESTIMATE OF BURDEN FOR EACH FORM

Form	Burden esti- mate per form (in minutes)	Number of respondents	Annual burden on respondents (in hours)
On-site survey Telephone survey	15 15	1250 250	312.5 62.5
Total		1500	375

Our practice is to make comments, including names and home addresses of respondents, available for public review. Individual respondents may request that we withhold their home address from public disclosure, which we will honor to the extent allowable by law. There also may be circumstances in which we would withhold a respondent's identity from public disclosure, as allowable by law. If you wish us to withhold your name and/or address, you must state this prominently at the beginning of your comment. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of

organizations or businesses, available for public disclosure in their entirety.

Dated: April 24, 2006.

# Office of Surface Mining Reclamation and Enforcement

# Notice of Proposed Information Collection for 1029–0027

**AGENCY:** Office of Surface Mining Reclamation and Enforcement. **ACTION:** Notice and request for

comments.

**SUMMARY:** In compliance with the Paperwork Reduction Act of 1995, the Office of Surface Mining Reclamation and Enforcement (OSM) is announcing its intention to request approval to continue the collections of information

under 30 CFR part 740, Surface Coal Mining and Reclamation Operations on Federal Lands. This information collection activity was previously approved by the Office of Management and Budget (OMB), and assigned clearance numbers 1029–0027.

**DATES:** Comments on the proposed information collection must be received by July 3, 2006, to be assured of consideration.

ADDRESSES: Comments may be mailed to John A. Trelease, Office of Surface Mining Reclamation and Enforcement, 1951 Constitution Ave., NW., Room 202—SIB, Washington, DC 20240. Comments may also be submitted electronically to jtreleas@osmre.gov.

**FOR FURTHER INFORMATION CONTACT:** To request a copy of the information collection requests, explanatory information and related forms, contact John A. Trelease, at (202) 208–2783.

SUPPLEMENTARY INFORMATION: OMB regulations at 5 CFR part 1320, which implementing provisions of the Paperwork Reduction Act of 1995 (Pub. L. 104-13), require that interested members of the public and affected agencies have an opportunity to comment on information collection and recordkeeping activities [see 5 CFR 1320.8 (d). This notice identifies an information collection that OSM will be submitting to OMB for approval. This collection is contained in 30 CFR part 740, General requirements for surface coal mining and reclamation operations on Federal lands (1029-0027). OSM will request a 3-year term of approval for this information collection activity.

Comments are invited on: (1) The need for the collection of information for the performance of the functions of the agency; (2) the accuracy of the agency's burden estimates; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the information collection burden on respondents, such as use of automated means of collection of the information. A summary of the public comments will accompany OSM's submission of the information collection requests to OMB.

The following information is provided for the information collection: (1) Title of the information collection; (2) OMB control number; (3) summary of the information collection activity; and (4) frequency of collection, description of the respondents, estimated total annual responses, and the total annual reporting and recordkeeping burden for the collection of information.

Title: 30 CFR Part 740—General requirements for surface coal mining

and reclamation operations on Federal lands.

OMB Control Number: 1029–0027.
Summary: Section 523 of SMCRA
requires that a Federal lands program be
established to govern surface coal
mining and reclamation operations on
Federal lands. The information
requested is needed to assist the
regulatory authority determine the
eligibility of an applicant to conduct
surface coal mining operations on
Federal lands.

Frequency of Collection: Once.
Description of Respondents:
Applicants for surface coal mine
permits on Federal lands, and State
Regulatory Authorities.

Total Annual Responses: 42. Total Annual Burden Hours for Applicants: 2,602.

Total Annual Burden Hours for States: 800.

Total Annual Burden for All Respondents: 3,402.

Dated: April 26, 2006.

Chief, Division of Regulatory Support. [FR Doc. 06–4125 Filed 5–1–06; 8:45 am] BILLING CODE 4310–05–M

# INTERNATIONAL TRADE COMMISSION

[Investigation No. 731–TA–1103 (Preliminary)]

### Certain Activated Carbon From China

### **Determination**

On the basis of the record¹ developed in the subject investigation, the United States International Trade Commission (Commission) determines, pursuant to section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)) (the Act), that there is a reasonable indication that an industry in the United States is materially injured by reason of imports from China of certain activated carbon,²

provided for in subheading 3802.10.00 of the Harmonized Tariff Schedule of the United States, that are alleged to be sold in the United States at less than fair value (LTFV).

# Commencement of Final Phase Investigation

Pursuant to section 207.18 of the Commission's rules, the Commission also gives notice of the commencement of the final phase of its investigation. The Commission will issue a final phase notice of scheduling, which will be published in the Federal Register as provided in section 207.21 of the Commission's rules, upon notice from the Department of Commerce (Commerce) of an affirmative preliminary determination in the investigation under section 733(b) of the Act, or, if the preliminary determination is negative, upon notice of an affirmative final determination in that investigation under section 735(a) of the Act. Parties that filed entries of appearance in the preliminary phase of the investigation need not enter a separate appearance for the final phase of the investigation. Industrial users,

forms of activated carbon that are activated by steam or  $\mathrm{CO}_2$ , regardless of raw material, grade, mixture, additives, further washing or post-activation chemical treatment (chemical or water washing, chemical impregnation or other treatment), or product form. Unless specifically excluded, this definition covers all physical forms of certain activated carbon, including powdered activated carbon ("PAC"), granular activated carbon ("GAC"), and pelletized activated carbon.

Excluded from this definition are chemically-activated carbons. The carbon-based raw material used in the chemical activation process is treated with a strong chemical agent, including but not limited to phosphoric acid or zinc chloride sulfuric acid, that dehydrates molecules in the raw material, and results in the formation of water that is removed from the raw material by moderate heat treatment. The activated carbon created by chemical activation has internal porosity developed primarily due to the action of the chemical dehydration agent. Chemically activated carbons are typically used to activate raw materials with a lignocellulosic component such as cellulose, including wood, sawdust, paper mill waste and peat.

To the extent that an imported activated carbon product is a blend of steam and chemically activated carbons, products containing 50 percent or more steam (or  $\mathrm{CO}_2$  gas) activated carbons are within this definition, and those containing more than 50 percent chemically activated carbons are outside this definition.

Also excluded from this definition are reactivated carbons and activated carbon cloth. Reactivated carbons are previously used activated carbons that have had adsorbed materials removed from their pore structure after use through the application of heat, steam and/or chemicals. Activated carbon cloth is a woven textile fabric made of or containing activated carbon fibers. It is used in masks and filters and clothing of various types where a woven format is required.

Any activated carbon meeting the physical description of subject merchandise provided above that is not expressly excluded from this definition is included within the definition.

<sup>&</sup>lt;sup>1</sup> 1 The record is defined in sec. 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

<sup>&</sup>lt;sup>2</sup> For purposes of this investigation, the product covered is certain activated carbon defined as a powdered, granular or pelletized carbon product obtained by "activating" with heat and steam various materials containing carbon, including but not limited to coal (including bituminous, lignite and anthracite), wood, coconut shells, olive stones, and peat. The thermal and steam treatments remove organic materials and create an internal pore structure in the carbon material. The producer can also use carbon dioxide gas (CO<sub>2</sub>) in place of steam in this process. The vast majority of the internal porosity developed during the high temperature steam (or CO<sub>2</sub> gas) activation process is a direct result of oxidation of a portion of the solid carbon atoms in the raw material, converting them into a gaseous form of carbon. This definition covers all
