II. Legal Basis

FMCSA has authority under 49 U.S.C. 31136(e) and 31315 to grant exemptions from certain parts of the Federal Motor Carrier Safety Regulations (FMCSRs). FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public an opportunity to inspect the information relevant to the application, including any safety analyses that have been conducted. The Agency must also provide an opportunity for public comment on the request.

The Agency reviews safety analyses and public comments submitted, and determines whether granting the exemption would likely achieve a level of safety equivalent to, or greater than, the level that would be achieved by the current regulation (49 CFR 381.305). The decision of the Agency must be published in the **Federal Register** (49 CFR 381.315(b)) with the reasons for denying or granting the application and, if granted, the name of the person or class of persons receiving the exemption, and the regulatory provision from which the exemption is granted. The notice must also specify the effective period and explain the terms and conditions of the exemption. The exemption may be renewed (49 CFR 381.300(b)).

III. Request for Exemption

SBTC reports that it is a non-profit trade organization with more than 8,000 members. SBTC states that it "represents, promotes, and protects the interest of small businesses in the transportation industry. Through the exemption application, SBTC seeks relief from the ELD requirements for small private, common and contract motor carriers with fewer than 50 employees. SBTC argues:

"[T]he ELD rule is not a "safety regulation" per se as the FMCSA has concluded. Rather it is a mechanism intended to enforce a safety regulation by regulating the manner in which a driver records and communicates his compliance. That is, it is merely a tool to determine compliance with an existing rule that regulates over-the-road drivers' driving and on duty time, namely the actual safety regulation: the [hours-of-service] regulations codified at 49 CFR 395.3 and 395.5. However, the ELD rule is not a safety regulation itself. Therefore, it is our position that this rule does *not* itself impact safety, and that the level of safety will not change based on whether or not our exemption application is approved. That would require a change to the [hours-of-service rules]."

SBTC asserts that the exemption would not have any adverse impacts on operational safety, as motor carriers and drivers would remain subject to the HOS regulations in 49 CFR 395.3, as well as the requirements to maintain a paper RODS under 49 CFR 395.8. The exemption would allow motor carriers with fewer than 50 employees to maintain their current practices that have resulted in a proven safety record. The term of the requested exemption, if granted, would be for five years, subject to renewal upon application.

A copy of SBTC's application for exemption is available for review in the docket for this notice.

Federal Railroad Administration

[Docket Number FRA-2007-28812]

Petition for Waiver of Compliance

Under part 211 of Title 49 Code of Federal Regulations (CFR), this provides the public notice that by a letter dated March 23, 2018 (and amended April 30, 2018), BNSF Railway Company (BNSF) petitioned the Federal Railroad Administration (FRA) for an extension of its waiver of compliance from certain

provisions of the Federal railroad safety regulations contained at 49 CFR part 232. FRA assigned the petition Docket Number FRA-2007-28812.

BNSF originally received conditional relief in 2008 from 49 CFR 232.205, *Class I brake test-initial terminal inspection*, and 49 CFR part 215, *Freight car safety standards*, for freight cars received in interchange at the United States/Mexico border crossing in Eagle Pass, TX, to permit required inspections to be conducted at Ryan's Ruin and Horan Siding, 14 miles north of the international border at Eagle Pass. BNSF's relief was extended for an additional five years in a decision letter dated March 26, 2013. In support of its present petition to extend its relief, BNSF states that the change in inspection point has proven a more efficient and safer operating environment.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov and in person at the U.S. Department of Transportation's (DOT) Docket Operations Facility, 1200 New Jersey Avenue SE, W12-140, Washington, DC 20590.
