BILLING CODE 4140-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Prospective Grant of an Exclusive Patent License: The Development of an Anti-BCMA Immunotoxin for the Treatment of Human Cancer

AGENCY: National Institutes of Health,
Department of Health and Human
Services.

ACTION: Notice.

SUMMARY: The National Cancer Institute,
an institute of the National Institutes of
Health, Department of Health and
Human Services, is contemplating the
grant of an Exclusive Patent License to
practice the inventions embodied in the
Patents and Patent Applications listed
in the **SUPPLEMENTARY INFORMATION**
section of this notice to BEORO
Therapeutics, GmbH. (“Beoro”) located
in Seefeld, Germany.

DATES: Only written comments and/or
complete applications for a license
which are received by the National
Cancer Institute’s Technology Transfer
Center on or before June 22, 2018 will
be considered.

ADDRESSES: Requests for copies of the
patent application, inquiries, and
comments relating to the contemplated
an Exclusive Patent License should be
directed to: David A. Lambertson, Ph.D.,
Senior Technology Transfer Manager,
NCI Technology Transfer Center, 9609
Medical Center Drive, RM 1E530 MSC
9702, Bethesda, MD 20892-9702 (for
business mail), Rockville, MD 20850-
9702 Telephone: (240)-276-5530;
Facsimile: (240)-276-5504 Email:
david.lambertson@nih.gov.

With respect to persons who have an obligation to assign their right, title and interest to the Government of the United States of America, the patent rights in these inventions have been assigned to the Government of the United States of America.

The prospective exclusive license territory may be worldwide and the field of use may be limited to the following:

“The development and commercialization of a monospecific BCMA-targeted immunotoxin, whereby the immunotoxin is comprised of:

- (1) the complementary determining region (CDR) sequences of either
 - i. the anti-BCMA antibody known as BM24; or
 - ii. the anti-BCMA antibody known as BM306; and

(2) a *Pseudomonas* Exotoxin A-based payload consisting of a PE25 variant with or without alterations of one or more amino acids in one or more B cell and/or T cell epitopes. for the treatment of hematological malignancies.”

The E-010-2016 technology discloses antibodies that recognize the BCMA (B Cell Maturation Antigen) protein. BCMA is expressed on the cell surface of several forms of cancer, most notably multiple myeloma. Although these BCMA antibodies can potentially be used in many therapeutic formats (e.g., unconjugated antibodies, bispecific antibodies (and variants thereof), antibody-drug conjugates (ADCs), chimeric antigen receptors (CARs), etc., to target cancer cells for destruction, the contemplated field of use only concerns the development of one specific format (recombinant immunotoxins) using one type of toxin variant (*Pseudomonas* Exotoxin A variants). Many other formats, and therefore fields of use, remain available for licensing and development.

The E-263-2011-0, E-174-2011-0, E-269-2009-0, E-292-2007, E-262-2005-0 and E-771-2013-0-5 technologies (i.e., “non-E-010-2016-0 technologies”) all concern distinct variants of *Pseudomonas* Exotoxin A which can be used in the BCMA-targeted immunotoxin. The *Pseudomonas* Exotoxin A variants represent the “payload” portion of the immunotoxin, which is the portion that instigates the destruction of the cancer cells that are targeted by the aforementioned BCMA antibodies.

The development of a new therapeutic targeting BCMA will benefit public health by offering up a treatment for these cancers in instances when conventional first line therapies are ineffective.

This notice is made in accordance with 35 U.S.C. 209 and 37 CFR part 404. The prospective exclusive license will be royalty bearing, and the prospective exclusive license may be granted unless within fifteen (15) days from the date of this published notice, the National Cancer Institute receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR part 404.

In response to this Notice, the public may file comments or objections. Comments and objections, other than those in the form of a completed license application, will not be treated confidentially, and may be made publicly available.

License applications submitted in response to this Notice will be

presumed to contain business confidential information and any release of information in these license applications will be made only as required and upon a request under the Freedom of Information Act, 5 U.S.C. 552.

National Institute of Nursing Research; Notice to Close Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute of Nursing Research Special Emphasis Panel; Multicenter Clinical Grants.

Date: June 6, 2018.

Time: 8:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Bethesda Marriott Suites, 6711 Democracy Boulevard, Bethesda, MD 20817.

Contact Person: Tamizchelvi Thyagarajan, Ph.D., Scientific Review Officer, National Institute of Nursing Research, National Institutes of Health, 6701 Democracy Boulevard, Bethesda, MD 20892, (301) 594-0343, Tamizchelvi.thagarajan@nih.gov.

This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.
