SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is considering the approval of the DFPS for the Diablo Canyon ISFSI. PGEC submitted an initial DFP and an updated DFP for NRC review and approval by letters dated December 17, 2012 (ADAMS Accession No. ML12353A315), and December 17, 2015

(ADAMS Accession No. ML15351A502), respectively. The NRC staff has prepared a final EA (ADAMS Accession No. ML18131A047) in support of its review of PGEC's DFPS in accordance with the NRC regulations in part 51 of title 10 of the *Code of Federal Regulations* (10 CFR), "Environmental Protection Regulations for Domestic Licensing and Related Regulatory Functions," which implements the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 *et seq.*). Based on the EA, the NRC staff has determined that approval of the DFPS for the Diablo Canyon ISFSI will not significantly affect the quality of the human environment, and accordingly, the staff has concluded that a FONSI is appropriate. The NRC staff further finds that preparation of an environmental impact statement is not warranted.

II. Environmental Assessment

Background

The Diablo Canyon ISFSI is located in Avila Beach, California. PGEC is authorized by the NRC, under License No. SNM-2511, to store spent nuclear fuel at the Diablo Canyon ISFSI.

The NRC requires its licensees to plan for the eventual decommissioning of their licensed facilities prior to license termination. On June 17, 2011, the NRC published a final rule in the **Federal Register** amending its decommissioning planning regulations (76 FR 35512). The final rule amended the NRC regulation, 10 CFR 72.30, which concerns financial assurance and decommissioning for ISFSIs. This regulation now requires each holder of, or applicant for, a license under 10 CFR part 72 to submit, for NRC review and approval, a DFP. The purpose of the DFP is to demonstrate the licensee's financial assurance (*i.e.*, that funds will be available to decommission the ISFSI). The NRC staff is reviewing the DFPS submitted by PGEC on December 13, 2012, and December 17, 2015. Specifically, the NRC must determine whether PGEC's DFPS contain the information required by §§ 72.30(b) and (c), and whether PGEC has provided reasonable assurance that funds will be available to decommission the ISFSI.

Description of the Proposed Action

The proposed action is the NRC's review and approval of PGEC's DFPS submitted in accordance with §§ 72.30(b) and (c). To approve the DFPS, the NRC will evaluate whether the decommissioning cost estimate adequately estimates the cost to conduct the required ISFSI decommissioning activities prior to license termination,
