

with respect to complying with DOT regulations, does not materially alter the fact that a railroad employee is an affected individual. Covered chemical facilities must ensure that affected individuals have appropriate background checks performed, to include a check for terrorist ties. This ICR allows covered chemical facilities, and their service providers that employ affected individuals, an opportunity to enable a check for terrorist ties to be performed against the TSDB.

Comment: One commenter stated that the CFATS PSP, as currently designed, “does not take into consideration that Tier 3 and 4 facilities present a comparatively lower risk profile than Tier 1 and 2 sites.” The commenter suggested that the Department acknowledge the lower risk profile of Tier 3 and Tier 4 covered chemical facilities and not require them to comply with 6 CFR 27.230(a)(12)(iv). The commenter requested that Tier 3 and Tier 4 covered chemical facilities still be allowed to voluntarily participate.

Response: The Department believes that 6 CFR 27.230(a)(12)(iv) mitigates the risk of an individual with terrorist ties having insider access. Terrorist insiders could cause significant harm to the United States through access to any tiered chemical facility. To achieve the anti-terrorism objective of CFATS, it is necessary to mitigate this risk by conducting terrorist ties checks at all covered facilities. RBPS 12 accordingly requires terrorist ties checks for facilities of all four tiers.

Comment: One commenter questioned the effectiveness of the CFATS PSP if “absent a clear national security, homeland security, or law enforcement rationale . . . DHS does not follow-up with the company to alert it of the possible threat.” The commenter further stated that the “value of conducting TSDB screening is questionable if an identified bad actor is permitted continued access to [chemicals of interest] unbeknownst to the facility, which is in the best position to ensure that the person is not afforded that opportunity.”

Response: The Department’s design of the CFATS Program is intended to promote and enhance the security of high-risk chemical facilities; the PSP is one element of the larger CFATS Program. To prevent a significant threat to a facility or loss of life, a high-risk chemical facility will be contacted where appropriate and in accordance with federal law and policy, and per law enforcement and intelligence requirements.

Endangered and Threatened Wildlife and Plants; Initiation of 5-Year Status Reviews of 50 Species in California, Nevada, and the Klamath Basin of Oregon

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of initiation of reviews; request for information.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), are initiating 5-year status reviews of 50 species in California, Nevada, and the Klamath Basin of Oregon under the Endangered Species Act of 1973, as amended (Act). A 5-year review is based on the best scientific and commercial data available at the time of the review; therefore, we are requesting submission of any new information on these species that has become available since the last review.

DATES: To ensure consideration in our reviews, we are requesting submission of new information no later than August 17, 2018. However, we will continue to accept new information about any species at any time.

ADDRESSES: For how and where to send information, see Request for New Information.

FOR FURTHER INFORMATION CONTACT: For whom to contact for species-specific information, see Request for New Information. Individuals who are hearing impaired or speech impaired may call the Federal Relay Service at 800–877–8337 for TTY assistance.

SUPPLEMENTARY INFORMATION:

Why do we conduct 5-year reviews?

Under the Endangered Species Act of 1973, as amended (Act; 16 U.S.C. 1531 *et seq.*), we maintain lists of endangered and threatened wildlife and plant species (referred to as the List) in the Code of Federal Regulations (CFR) at 50 CFR 17.11 (for wildlife) and 17.12 (for plants). Section 4(c)(2)(A) of the Act requires us to review each listed species’ status at least once every 5 years. For additional information about 5-year reviews, refer to our factsheet at <http://www.fws.gov/endangered/what-we-do/recovery-overview.html>.

What information do we consider in our review?

A 5-year review considers all new information available at the time of the review. In conducting these reviews, we consider the best scientific and commercial data that have become available since the listing determination or most recent status review, such as:

(A) Species biology, including but not limited to population trends, distribution, abundance, demographics, and genetics;

(B) Habitat conditions, including but not limited to amount, distribution, and suitability;

(C) Conservation measures that have been implemented to benefit the species;

(D) Threat status and trends in relation to the five listing factors (as defined in section 4(a)(1) of the Act); and

(E) Other new information, data, or corrections, including but not limited to taxonomic or nomenclatural changes, identification of erroneous information contained in the List, and improved analytical methods.

Any new information will be considered during the 5-year review and will also be useful in evaluating the ongoing recovery programs for the species.

Which species are under review?

This notice announces our active review of the species listed in the table below.

What is a Distinct Population Segment?

Yellow-billed cuckoo, mountain yellow-legged frog, and western snowy plover were each listed as a Distinct Population Segment (DPS) of a vertebrate taxon. A DPS is defined in the February 7, 1996, Policy Regarding the Recognition of Distinct Vertebrate Population Segments (61 FR 4722). For a population to be listed under the Act as a distinct vertebrate population segment, three elements are considered: (1) The discreteness of the population segment in relation to the remainder of the species to which it belongs; (2) the significance of the population segment to the species to which it belongs; and (3) the population segment's conservation status in relation to the Act's standards for listing (*i.e.*, is the population segment endangered or threatened?). Distinct population segments of vertebrate species, as well as subspecies of all listed species, may be proposed for separate reclassification or for removal from the list. We will apply the DPS policy during the 5-year review.

Request for New Information

To ensure that a 5-year review is complete and based on the best available scientific and commercial information, we request new

information from all sources. See What Information Do We Consider in Our Review? for specific criteria. If you submit information, please support it with documentation such as maps, bibliographic references, methods used to gather and analyze the data, and/or copies of any pertinent publications, reports, or letters by knowledgeable sources.

To get more information on a species, submit information on a species; or review information we receive, please use the following contact information, depending on the Lead Fish and Wildlife Office for the species specified in the table above.

Notice of Inventory Completion: Heard Museum, Phoenix, AZ

AGENCY: National Park Service, Interior.
ACTION: Notice.

SUMMARY: The Heard Museum has completed an inventory of human remains, in consultation with the appropriate Indian Tribes or Native Hawaiian organizations, and has determined that there is a cultural affiliation between the human remains and present-day Indian Tribes or Native Hawaiian organizations. Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request to the Heard Museum. If no additional requestors come forward, transfer of control of the human remains to the lineal descendants, Indian Tribes, or Native

Hawaiian organizations stated in this notice may proceed.

DATES: Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to the Heard Museum at the address in this notice by July 18, 2018.

ADDRESSES: David Roche, Director/CEO, Heard Museum, 2301 North Central Avenue, Phoenix, AZ 85004, telephone (602) 252-8840, email *director@heard.org*.

SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains under the control of the Heard Museum, Phoenix, AZ. The human remains were removed from Navajo County, AZ.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

Consultation

A detailed assessment of the human remains was made by the Heard Museum professional staff in consultation with representatives of the Hopi Tribe of Arizona and Zuni Tribe of the Zuni Reservation, New Mexico.

History and Description of the Remains

Sometime prior to 1991, human remains representing, at minimum, one individual were removed from Navajo County, AZ. In 1991, the human remains were found in museum storage and assigned catalog number NA-SW-PR-T-5. The individual was an adult aged 18-20 years, of unknown gender. No known individuals were identified. No associated funerary objects were present. A note with the remains identified it as "Pueblo."

Determinations Made by the Heard Museum

Officials of the Heard Museum have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of one individuals of Native American ancestry.
- Pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group

identity that can be reasonably traced between the Native American human remains and Hopi Tribe of Arizona and Zuni Tribe of the Zuni Reservation, New Mexico.

Additional Requestors and Disposition

Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to David Roche, Director/CEO, Heard Museum, 2301 North Central Avenue, Phoenix, AZ 85004, telephone (602) 252-8840, email *director@heard.org*, by July 18, 2018. After that date, if no additional requestors have come forward, transfer of control of the human remains to the Hopi Tribe of Arizona; Pueblo of Acoma, New Mexico; Pueblo of Laguna, New Mexico; and Zuni Tribe of the Zuni Reservation, New Mexico may proceed.

The Heard Museum is responsible for notifying the Hopi Tribe of Arizona and Zuni Tribe of the Zuni Reservation, New Mexico that this notice has been published.

Dated: May 2, 2018.
