

as barriers to the provision of effective care coordination for individuals with spina bifida, CDC's National Center on Birth Defects and Developmental Disabilities proposes to conduct a study using focus groups and interviews. The proposed activity is part of the National Spina Bifida Program mandated in Section 317C of the Public Health Service Act (42 U.S.C. 247b-4)

Researchers will visit 10 spina bifida clinics nationwide. At each clinic, 1 focus group with approximately 8 caregivers of children with spina bifida will be conducted. Each focus group will last about 2 hours. At each clinic, approximately 5 clinical staff will be interviewed; each interview will take approximately 45 minutes. Focus group and interview respondents will be asked a variety of questions related to care

coordination for individuals with spina bifida including how care is coordinated in the clinic, barriers and facilitators to the provision of care coordination, the effectiveness of care coordination, and recommendations for improving care coordination. All responses to the focus groups and interviews will be treated in a private manner.

There will be no costs to the respondents other than their time.
