The Integrated Public Alert and Warning System (IPAWS) is the Department of Homeland Security's (DHS) response to the Executive Order. The Stafford Act (U.S.C. Updated Collision Risk Model Priors for Estimating Eagle Fatalities at Wind Energy Facilities

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability and request for comments.

SUMMARY: The U.S. Fish and Wildlife Service (Service) uses a collision risk model (CRM) to predict the number of golden and bald eagles that may be killed at new wind facilities. The model incorporates existing information on eagle exposure and collision probability in the form of prior distributions (priors). The Service has undertaken an analysis to update the priors using all available data that meet specific criteria for both species of eagle. This notice announces the availability of a summary report of that analysis, which generates new exposure and collision priors for both species of eagle. We are soliciting public comments on the summary report, which will be considered by the Service before using the new priors in the CRM.

DATES: To ensure consideration of written comments, they must be submitted on or before August 20, 2018.

ADDRESSES: You may submit written comments by one of the following methods:

Electronically: Go to the Federal eRulemaking Portal: <http://www.regulations.gov>. Search for FWS-HQ-MB-2017-xxxx, which is the docket number for this notice, and follow the directions for submitting comments.
