Background

Section 182.a of the Atomic Energy Act of 1954, as amended, provides that each application for a license shall state such information as the Commission, by rule or regulation, may determine to be necessary to decide the financial qualifications of the applicant as the Commission may deem appropriate for the license. The Act and the Commission's regulations reflect that the fundamental purpose of the financial qualifications provision of that section is the protection of the public health and safety and the common defense and security. Although the Commission's safety determinations required for the issuance of facility licenses are based upon extensive and detailed technical review, an applicant's financial qualifications can also contribute to its ability to meet its responsibilities on safety matters.

Discussion

NRC considers this action noncontroversial and is publishing this proposed rule concurrently as a direct final rule. The Commission considers this rulemaking action noncontroversial because the annual reports and the certified financial statements currently required by § 50.71(b) and 72.80(b), are typically written for the shareholders, and contain information pertaining to financial qualifications, that may be outdated by the time it is published. The reports can be found posted on the company's Web site as well as on the SEC or FERC Web sites. The NRC has concluded that for licensees that are required to file financial reports with the SEC or the FERC, licensee financial information can be collected in a more cost-effective way than requiring licensees to submit the reports required by 10 CFR 50.71 (b) and 10 CFR 72.80 (b). The NRC has access to other more current sources of information than the annual financial reports to assess the licensees' financial condition, making the submittal of the annual financial report to the NRC unnecessary. Additionally, NRC has the authority to request licensees to submit additional or more detailed information regarding their financial status if the Commission considers this information appropriate. The direct final rule will become effective on August 7, 2006. However, if the NRC receives significant adverse comments on the direct final rule by

June 21, 2006, then the NRC will publish a document that withdraws the direct final rule. If the direct final rule is withdrawn, the NRC will address the comments received in response to the proposed revisions requiring republication, the NRC will not initiate a second comment period for this action in the event the direct final rule is withdrawn.

A significant adverse comment is a comment where the commenter explains why the rule would be inappropriate, including challenges to the rule's underlying premise or approach, or would be ineffective or unacceptable without a change. A comment is adverse and significant if:

(1) The comment opposes the rule and provides a reason sufficient to require a substantive response in a notice-and-comment process. For example, a substantive response is required when—

(A) The comment causes the staff to reevaluate (or reconsider) its position or conduct additional analysis;

(B) The comment raises an issue serious enough to warrant a substantive response to clarify or complete the record; or

(C) The comment raises a relevant issue that was not previously addressed or considered by the staff.

(2) The comment proposes a change or an addition to the rule and it is apparent that the rule would be ineffective or unacceptable without incorporation of the change or addition.

(3) The comment causes the staff to make a change (other than editorial) to the rule.
