Title of Proposal: Grant Application Standard Logic Model.

Description of Information Collection: Applicants of HUD Federal Financial Assistance will be required to indicate intended results and impacts. Grant recipients will be required to report against their baseline performance standards. HUD's previously approved

collection instrument has been revised. This revised information collection automates responses through a drop down table listing. This was done in response to customer concerns about the difficulty in putting information in the previously approved form. The revised collection adds an additional requirement for addressing a series of

tailored management questions and a return on investment statement when reporting back to HUD. This process will replace various, current progress reporting requirements and reduce reporting burdens. It will also promote greater emphasis on performance and results in grant programs. The management questions are based on the

© Carter-Richmond methodology that identifies key management and evaluation questions for HUD's programs. The following table identifies the ©Carter-Richmond generic questions and where the source data is found in the Logic Model.
