Background: EPA issued a draft Report on the Environment 2003 describing the status of and trends in the environment and human health. This report was reviewed by the SAB (see http://www.epa.gov/sab/pdf/sab_05_004.pdf). EPA has now prepared a new draft Report on the Environment Technical Document 2007 (ROE 2007) that addresses previous SAB recommendations. EPA's Office of Research and Development (ORD) has requested that the SAB review the latest draft of the ROE 2007. This draft Report on the Environment Technical Document updates information to answer key questions concerning the status of and trends in the environment and human health and contains new indicators as previously suggested by the SAB. National and some regional environmental trends are described along with indicator limitations and gaps. The SAB has been asked to: (1) Assess the adequacy of the approaches, processes, or frameworks used in the ROE 2007 to answer specified questions; (2) assess the adequacy of the technical content of the indicators provided in major theme areas in the ROE 2007 with regard to completeness of the technical data used and the relevance of indicators to the areas of concern; and (3) evaluate the appropriateness of the conclusions in the ROE 2007. This notice specifically requests nominations for candidates to serve on a new SAB panel that will critically review ROE 2007.
