SUPPLEMENTARY INFORMATION: The BLM prepared this EIS to comply with a minute order issued by the Honorable Howard D. McKibben, U.S. District Judge, District of Nevada, on August 18, 2004 (CV-N-03-197-HDM(VPC)). The order followed a hearing on a complaint against three final multiple use decisions (*Western Watersheds Project and Committee for the High Desert vs. Clinton R. Oke, Assistant Field Manager, Elko Field Office, et al.*). The final decisions, which were left intact by the judge, are for the Sheep Allotment Complex, Big Springs Allotment and Owyhee Allotment. The Sheep Allotment Complex and Big Springs grazing allotments are located in the southeastern portion of Elko County, NV, and the Owyhee Allotment is in the northwest portion of Elko County.

The order was to prepare the EIS with respect to burrowing owls, other BLM sensitive raptor species, and sage-grouse on the Sheep Complex and the Owyhee Allotment, and sage-grouse on the Big Springs Allotment. To the extent applicable, the EIS was to analyze the impacts of livestock grazing proposed by the multiple use decisions and alternatives to these sensitive bird species and considering springs, seeps, riparian areas and upland habitat. A range of alternatives (including the no-action alternative) was developed to address the issues outlined in the court order.

A Notice of Intent to prepare the EIS was published in the **Federal Register** on December 17, 2004, and it initiated a 30-day public scoping period. A

Memorandum of Understanding (MOU) between the Nevada Department of Wildlife (NDOW) and the BLM Elko Field Office was signed establishing Cooperating Agency status for NDOW. A public scoping meeting was held January 6, 2005. A project briefing was given to the Elko County Public Land Use Advisory Commission on February 4, 2005 and to the Nevada Society of Range Management on January 25, 2005. The Draft EIS was filed with EPA and their **Federal Register** Notice was published on December 9, 2005. A public open house to discuss the Draft EIS was held on January 11, 2006, and the public comment period closed on January 24, 2006.

Comments on the Draft EIS are included in the Final EIS, and resulted in the addition of mitigation measures and additional analyses to address concerns expressed with the Proposed Action alternative, which is to implement the Final Multiple Use Decisions.

Copies of the Final EIS have been sent to affected Federal, State and local Government agencies, Tribal governments, and to interested parties. Copies of the Final EIS are available for public inspection at the BLM Elko Field Office, 3900 East Idaho Street, Elko, NV. Interested persons may also review the Final EIS on the Internet at http://www.blm.gov/nhp/spotlight/state_info/planning.htm.

The Hiawatha and Blind Canyon beds contains around 400 thousand tons of recoverable high-volatile A to B bituminous coal. The coal quality in the Hiawatha coal bed on an "as received basis" is as follows: 12,892 Btu/lb., 4.54

percent moisture, 7.69 percent ash, 42.46 percent volatile matter, 45.48 percent fixed carbon and 0.57 percent sulfur. The coal quality in the Blind Canyon coal bed on an "as received basis" is as follows: 13,314 Btu/lb., 5.26 percent moisture, 4.68 percent ash, 44.18 percent volatile matter, 45.88 percent fixed carbon and 0.61 percent sulfur.

2. The mining methods or methods which would achieve maximum economic recovery of the coal, including specifications of seams to be mined and the most desirable timing and rate of production;
3. Whether this tract is likely to be mined as part of an existing mine and therefore should be evaluated on a realistic incremental basis, in relation to the existing mine to which it has the greatest value;
4. Whether the tract should be evaluated as part of a potential larger mining unit and reevaluated as a portion of a new potential mine (*i.e.*, a tract which does not in itself form a logical mining unit);
5. Restrictions to mining that may affect coal recovery;
6. The price that the mined coal would bring when sold;
7. Costs, including mining and reclamation, of producing the coal and the time of production;
8. The percentage rate at which anticipated income streams should be discounted, either with inflation or in the absence of inflation, in which case the anticipated rate of inflation should be given;
9. Depreciation, depletion, amortization and other tax accounting factors;
10. The value of any surface estate where held privately;
11. Documented information on the terms and conditions of recent and similar coal land transactions in the lease sale area;

12. Any comparable sales data of similar coal lands; and coal quantities and the FMV of the coal developed by BLM may or may not change as a result of comments received from the public and changes in the market conditions between now and when final economic evaluations are completed.

In accordance with Federal coal management regulations 43 CFR parts 3422 and 3425, the public meeting is being held on the proposed sale to allow public comment on and discussion of the potential effects of mining and proposed lease. The meeting is being advertised in the Emery County Progress located in Castledale, Utah. 43 CFR part 3422 states that, no less than 30 days prior to the publication of the notice of the sale, the Secretary shall submit public comments on the FMV appraisal and the MER, and on factors that may affect these two determinations.
