SUPPLEMENTARY INFORMATION:

I. Abstract

The Annual Survey of Foreign Ocean Carriers' Expenses in the United States (BE–29) is a survey that collects data from U.S. agents of foreign ocean carriers who handle 40 or more foreign ocean port calls in the reporting period, or report total covered expenses of \$250,000 or more in the reporting period for all foreign ocean vessels handled by the U.S. agent. The covered expenses are: (1) Port call services such as pilotage, towing and tugboat services, harbor fees, and berth fees; (2) cargo-related services such as loading, unloading, and storing cargo at U.S. ports; (3) fuels and oils (bunkers) purchased in U.S. ports; (4) other vessel operating expenses such as stores and supplies, vessel repairs, and personnel expenses in the United States; and (5) other expenses such as U.S. agents' and brokers' fees and commissions and expenses related to maintaining U.S. offices, such as rent, advertising, and wages.

The data collected on the survey are needed to monitor U.S. trade in transport services to analyze the impact of U.S. trade on the U.S. and foreign economies, to compile and improve the U.S. economic accounts, to support U.S. commercial policy on trade in transport services, to conduct trade promotion, and to improve the ability of U.S. businesses to identify and evaluate market opportunities. The data are used in estimating the transport component of the U.S. international transactions accounts (ITAs) and national income and product accounts (NIPAs).

The Bureau of Economic Analysis (BEA) is proposing no additions or modifications to the current BE–29 survey. The effort to keep current reporting requirements unchanged is intended to minimize respondent burden while considering the needs of data users. Existing language in the instructions and definitions will be reviewed and adjusted as necessary to clarify survey requirements.

II. Method of Collection

BEA contacts potential respondents by mail in January of each year. Respondents must file the completed BE–29 forms within 90 days after the
