

governments' cybersecurity programs gaps and capabilities the NCSR question set may slightly change from year-to-year.

The NCSR is an annual voluntary self-assessment that is hosted on the RSA Archer Suite, which is a technology platform that provides a foundation for managing policies, controls, risks, assessments, and deficiencies across organizational lines of business. The NCSR self-assessment runs every year from October–December. In efforts of increasing participation, the deadline is sometimes extended. The target audience for the NCSR are personnel within the SLTT community who are responsible for the cybersecurity management within their organization.

Through the NCSR, DHS & MS-ISAC will examine relationships, interactions, and processes governing IT management and the ability to effectively manage operational risk. Using the anonymous results of the NCSR, DHS delivers a bi-annual summary report to Congress that provides a broad picture of the cybersecurity gaps & capabilities of SLTT governments across the nation. The bi-annual summary report is shared with MS-ISAC members, NCSR End Users, and Congress. The report is also available on the MS-ISAC website, <https://www.cisecurity.org/ms-isac/services/ncsr/>.

Upon submission of the NCSR self-assessment, participants will immediately receive access to several reports specific to their organization and their cybersecurity posture. Additionally, after the annual NCSR survey closes there will be a brief NCSR End User Survey offered to everyone who completed the NCSR assessment. The survey will provide feedback on participants' experiences, such as from how they heard about the NCSR, what they found or did not find useful, how they will utilize the results of their assessment, and other information about their current and future interactions with the NCSR.

Additionally, MS-ISAC will administer a survey to those who were registered participants in the past and did not register or complete the most recent NCSR. The purpose of the Non-Response Survey is to solicit feedback on ways the NCSR could be improved to maximize benefits and increase response rates in the future.

The NCSR assessment requires approximately two hours for completion and is located on the RSA Archer Suite. During the assessment period, participants can respond at their own pace with the ability to save their progress during each session. If additional support is needed,

participants can contact the NCSR helpdesk via phone and email.

The NCSR End User survey will be fully electronic. It contains less than 30 multiple choice and fill-in-the-blank answers and takes approximately 10 minutes to complete. The feedback survey will be administered via Survey Monkey and settings will be updated to opt out of collecting participants' IP addresses.

The Non-Response Survey will be fully electronic and take approximately 10 minutes to complete. The survey will be administered via Survey Monkey and settings will be updated to opt out of collecting participants' IP addresses.

A. Overview of Information Collection

Title of Information Collection: Housing Trust Fund (HTF).

OMB Approval Number: 2506–New.

Type of Request: New collection.

Form Number: SF-1199A, HUD-27055, SF-424, SF-425.

Description of the need for the information and proposed use: The information collected through HUD's Integrated Disbursement and Information System (IDIS) (24 CFR § 93.402) is used by HUD Field Offices, HUD Headquarters, and HTF Grantees. The information on program funds committed and disbursed is used by HUD to track grantee performance and to determine compliance with the statutory 24-month commitment deadline and the regulatory 5-year expenditure deadline (§ 93.400(d)). The project-specific property, tenant, owner, and financial data is used to make program management decisions about how well program participants are achieving the statutory objectives of the HTF Program. Program management reports are generated by IDIS to provide data on the status of program

participants' commitment and disbursement of HTF funds. These reports are provided to HUD staff as well as to HTF grantees.

Financial, project, tenant and owner documentation are used to determine compliance with HTF Program cost limits (§ 93.404), eligible activities (§ 93.200), and eligible costs (§ 93.201). Other information collected under Subpart H (Other Federal Requirements) is primarily intended for local program management and is only viewed by HUD during routine monitoring visits. The written agreement with the owner for long-term obligation (§ 93.404(b)) and tenant protections (§ 93.303) are required to ensure that the property owner complies with these important elements of the HTF Program and are also reviewed by HUD during monitoring visits. HUD reviews all other data collection requirements during monitoring to assure compliance with

the requirements of the Act and other related laws and authorities.

HUD tracks grantee performance and compliance with the requirements of 24 CFR parts 91 and 93. Grantees use the required information in the execution of their program, and to gauge their own performance in relation to stated goals.

Respondents (i.e., affected public): State grantees.

Estimated Number of Respondents: 56.

Estimated Number of Responses: 12,130.

Frequency of Response: Most data are collected annually, though there are specific items that are requested monthly.

Average Hours per Response: 2.16 hours.

Total Estimated Burdens: 26,219 hours.

The applicants are Tohopekaliga Water Authority; Mystic Dunes, LLC; Clay Cut, LLC; and Land Acquisition One, LLC. We invite comments from the public and Federal, Tribal, State, and local governments on the four applicants' HCPs, and our draft environmental action statements and low-effect screening forms, which support categorical exclusions under the National Environmental Policy Act.
