SUPPLEMENTARY INFORMATION:

I. Background

A. Fiscal Year DSH Allotments

A state's federal fiscal year (FY) disproportionate share hospital (DSH) allotment represents the aggregate limit on the federal share amount of the state's DSH payments to DSH hospitals

in the state for the FY. The amount of such allotment is determined in accordance with the provisions of section 1923(f)(3) of the Social Security Act (the Act), with some state-specific exceptions as specified in section 1923(f) of the Act. Under such provisions, in general a state's FY DSH allotment is calculated by increasing the amount of its DSH allotment for the preceding FY by the percentage change in the Consumer Price Index for all Urban Consumers (CPI-U) for the previous FY.

The Patient Protection and Affordable Care Act of 2010 (Pub. L. 111–148), as amended by the Health Care and Education Reconciliation Act of 2010 (Pub. L. 111–152) (collectively, the Affordable Care Act), amended Medicaid DSH provisions, adding section 1923(f)(7) of the Act. Section 1923(f)(7) of the Act would have required reductions to states' FY DSH allotments from FY 2014 through FY 2020, the calculation of which was described in the Disproportionate Share Hospital Payment Reduction final rule published in the September 18, 2013 **Federal Register** (78 FR 57293). Subsequent legislation, most recently by the Bipartisan Budget Act of 2018 (Pub. L. 115–123, enacted February 9, 2018), delayed the start of these reductions until FY 2020. A proposed rule delineating a revised methodology for the calculation of DSH allotment reductions previously scheduled to begin in FY 2018 was published in the July 28, 2017 **Federal Register** (82 FR 35155).

Because there are no reductions to DSH allotments for FY 2016 and FY 2018 under section 1923(f)(7) of the Act, as amended, this notice contains only the state-specific final FY 2016 DSH allotments and preliminary FY 2018 DSH allotments, as calculated under the statute without application of the reductions that would have been imposed under the Affordable Care Act provisions beginning with FY 2014. This notice also provides information on the calculation of such FY DSH allotments, the calculation of the states' institutions for mental diseases (IMDs) DSH limits, and the amounts of states' final FY 2016 IMD DSH limits and preliminary FY 2018 IMD DSH limits.

B. Determination of Fiscal Year DSH Allotments

Generally, in accordance with the methodology specified under section 1923(f)(3) of the Act, a state's FY DSH allotment is calculated by increasing the amount of its DSH allotment for the preceding FY by the percentage change in the CPI-U for the previous FY. Also

in accordance with section 1923(f)(3) of the Act, a state's DSH allotment for a FY is subject to the limitation that an increase to a state's DSH allotment for a FY cannot result in the DSH allotment exceeding the greater of the state's DSH allotment for the previous FY or 12 percent of the state's total medical assistance expenditures for the allotment year (this is referred to as the 12 percent limit).

Furthermore, under section 1923(h) of the Act, federal financial participation (FFP) for DSH payments to IMDs and other mental health facilities is limited to state-specific aggregate amounts. Under this provision, the aggregate limit for DSH payments to IMDs and other mental health facilities is the lesser of a state's FY 1995 total computable (state and federal share) IMD and other mental health facility DSH expenditures applicable to the state's FY 1995 DSH allotment (as reported on the Form CMS–64 as of January 1, 1997), or the amount equal to the product of the state's current year total computable DSH allotment and the applicable percentage specified in section 1923(h) of the Act.

In general, we determine states' DSH allotments for a FY and the IMD DSH limits for the same FY using the most recent available estimates of or actual medical assistance expenditures, including DSH expenditures in their Medicaid programs and the most recent available change in the CPI-U used for the FY in accordance with the methodology prescribed in the statute. The indicated estimated or actual expenditures are obtained from states for each relevant FY from the most recent available quarterly Medicaid budget reports (Form CMS–37) or quarterly Medicaid expenditure reports (Form CMS–64), respectively, submitted by the states. For example, as part of the initial determination of a state's FY DSH allotment (referred to as the preliminary DSH allotments) that is determined before the beginning of the FY for which the DSH allotments and IMD DSH limits are being determined, we use estimated expenditures for the FY obtained from the August submission of the CMS–37 submitted by states prior to the beginning of the FY; such estimated expenditures are subject to update and revision during the FY before such actual expenditure data become available. We also use the most recent available estimated CPI-U percentage change that is available before the beginning of the FY for determining the states' preliminary FY DSH allotments; such estimated CPI-U percentage change is subject to update and revision during the FY before the actual CPI-U

percentage change becomes available. In determining the final DSH allotments and IMD DSH limits for a FY we use the actual expenditures for the FY and actual CPI-U percentage change for the previous FY.

II. Provisions of the Notice

A. Calculation of the Final FY 2016 Federal Share State DSH Allotments, and the Preliminary FY 2018 Federal Share State DSH Allotments

1. Final FY 2016 Federal Share State DSH Allotments

Addendum 1 to this notice provides the states' final FY 2016 DSH allotments determined in accordance with section 1923(f)(3) of the Act. As described in the background section, in general, the DSH allotment for a FY is calculated by increasing the FY DSH allotment for the preceding FY by the CPI-U increase for the previous fiscal year. For purposes of calculating the states' final FY 2016 DSH allotments, the preceding final fiscal year DSH allotments (for FY 2015) were published in the November 3, 2017 **Federal Register** (82 FR 51259). For purposes of calculating the states' final FY 2016 DSH allotments we are using the actual Medicaid expenditures for FY 2016. Finally, for purposes of calculating the states' final FY 2016 DSH allotments, the applicable historical percentage change in the CPI-U for the previous FY (FY 2015) was 0.3 percent; we note that this is the same as the estimated 0.3 percentage change in the CPI-U for FY 2015 that was available and used in the calculation of the preliminary FY 2016 DSH allotments which were published in the October 26, 2016 **Federal Register** (81 FR 74432).

2. Calculation of the Preliminary FY 2018 Federal Share State DSH Allotments

Addendum 2 to this notice provides the preliminary FY 2018 DSH allotments determined in accordance with section 1923(f)(3) of the Act. The preliminary FY 2018 DSH allotments contained in this notice were determined based on the most recent available estimates from states of their FY 2018 total computable Medicaid expenditures. Also, the preliminary FY 2018 allotments contained in this notice were determined by increasing the preliminary FY 2017 DSH allotments. The estimated percentage increase in the CPI-U for FY 2017 was 2.4 percent (CMS originally published the preliminary FY 2017 DSH allotments in the November 3, 2017 **Federal Register** (82 FR 51259)).

We will publish states' final FY 2018 DSH allotments in a future notice based on the states' four quarterly Medicaid expenditure reports (Form CMS-64) for FY 2018 available following the end of FY 2018 utilizing the actual change in the CPI-U for FY 2017.

B. Calculation of the Final FY 2016 and Preliminary FY 2018 IMD DSH Limits

Section 1923(h) of the Act specifies the methodology to be used to establish the limits on the amount of DSH payments that a state can make to IMDs and other mental health facilities. FFP is not available for DSH payments to IMDs or other mental health facilities that exceed the IMD DSH limits. In this notice, we are publishing the final FY 2016 and the preliminary FY 2018 IMD DSH limits determined in accordance with the provisions discussed above.

Addendums 3 and 4 to this notice detail each state's final FY 2016 and preliminary FY 2018 IMD DSH limit, respectively, determined in accordance with section 1923(h) of the Act.

III. Collection of Information Requirements

As it relates to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), this notice does not impose any new or revised collection of information requirements or burden. While discussed in section I.B. and in Addendums 3 and 4 of this notice, the requirements and burden associated with Form CMS-37 and Form CMS-64 are unaffected by this notice. Both forms are approved by the Office of Management and Budget (OMB) under control number 0938-1265. Since this notice will not impose any new or revised requirements/burden, we are not making any changes under that control number.

IV. Regulatory Impact Analysis

We have examined the impact of this notice as required by Executive Order 12866 on Regulatory Planning and Review (September 1993), the Regulatory Flexibility Act (RFA) (September 19, 1980, Pub. L. 96-354), section 1102(b) of the Act, section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4; enacted on March 22, 1995) (UMRA '95), Executive Order 13132 on Federalism (August 4, 1999) and the Congressional Review Act (5 U.S.C. 804(2)), and Executive Order 13771 on Reducing Regulation and Controlling Regulatory Costs (January 30, 2017).

Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select

regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). A regulatory impact analysis (RIA) must be prepared for major rules with economically significant effects (\$100 million or more in any 1 year). This notice reaches the \$100 million economic threshold and thus is considered a major rule under the Congressional Review Act.

The final FY 2016 DSH allotments being published in this notice are approximately \$11 million more than the preliminary FY 2016 DSH allotments published in the October 26, 2016 **Federal Register** (81 FR 74432). The increase in the final FY 2016 DSH allotments is a result of being calculated by multiplying the actual increase in the CPI-U for 2015 by the final FY 2015 DSH allotments, while the preliminary FY 2016 DSH allotments were calculated by multiplying the estimated CPI-U for 2015 by the preliminary FY 2015 DSH allotments. Although the estimated and actual increase in the CPI-U remained the same at 0.3 percent, the preliminary FY 2015 DSH allotments were lower than the final FY 2015 DSH allotments and therefore the final FY 2016 DSH allotments are higher than the preliminary FY 2016 DSH allotments. The final FY 2016 IMD DSH limits being published in this notice are approximately \$14 million more than the preliminary FY 2016 IMD DSH limits published in the October 26, 2016 **Federal Register** (81 FR 74432). The increases in the IMD DSH limits are because the DSH allotment for a FY is a factor in the determination of the IMD DSH limit for the FY. Since the final FY 2016 DSH allotments were increased as compared to the preliminary FY 2016 DSH allotments, the associated FY 2016 IMD DSH limits for some states were also increased.

The preliminary FY 2018 DSH allotments being published in this notice have been increased by approximately \$288 million more than the preliminary FY 2017 DSH allotments published in the November 3, 2017 **Federal Register** (82 FR 51259). The increase in the DSH allotments is due to the application of the statutory formula for calculating DSH allotments under which the prior fiscal year allotments are increased by the percentage increase in the CPI-U for the prior fiscal year. The preliminary FY 2018 IMD DSH limits being published in this notice are approximately \$24 million more than the preliminary FY 2017 IMD DSH limits published in the November 3, 2017 **Federal Register** (82 FR 51259). The increases in the IMD

DSH limits are because the DSH allotment for a FY is a factor in the determination of the IMD DSH limit for the FY. Since the preliminary FY 2018 DSH allotments are greater than the preliminary FY 2017 DSH allotments, the associated preliminary FY 2018 IMD DSH limits for some states also increased.

The RFA requires agencies to analyze options for regulatory relief of small businesses, if a rule has a significant impact on a substantial number of small entities. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and small governmental jurisdictions. Most hospitals and most other providers and suppliers are small entities, either by nonprofit status or by having revenues of less than \$7.0 million to \$34.5 million in any one year. Individuals and states are not included in the definition of a small entity. We are not preparing an analysis for the RFA because the Secretary has determined that this notice will not have significant economic impact on a substantial number of small entities. Specifically, any impact on providers is due to the effect of the various controlling statutes; providers are not impacted as a result of the independent regulatory action in publishing this notice. The purpose of the notice is to announce the latest DSH allotments and IMD DSH limits, as required by the statute.

In addition, section 1102(b) of the Act requires us to prepare a regulatory impact analysis if a rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a Core-Based Statistical Area for Medicaid payment regulations and has fewer than 100 beds. We are not preparing analysis for section 1102(b) of the Act because the Secretary has determined that this notice will not have a significant impact on the operations of a substantial number of small rural hospitals.

The Medicaid statute specifies the methodology for determining the amounts of states' DSH allotments and IMD DSH limits; and as described previously, the application of the methodology specified in statute results in the decreases or increases in states' DSH allotments and IMD DSH limits for the applicable FYs. The statute applicable to these allotments and limits does not apply to the determination of the amounts of DSH payments made to specific DSH hospitals; rather, these

allotments and limits represent an overall limit on the total of such DSH payments. For this reason, we do not believe that this notice will have a significant economic impact on a substantial number of small entities.

Section 202 of the Unfunded Mandates Reform Act of 1995 also requires that agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any 1 year of \$100 million in 1995 dollars, updated annually for inflation. In 2018, that threshold is approximately \$150 million. This notice will have no consequential effect on spending by state, local, or tribal governments, in the aggregate, or on the private sector.

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a proposed rule (and subsequent final rule) that imposes substantial direct requirement costs on state and local governments, preempts state law, or otherwise has Federalism implications. Since this notice does not impose any costs on state or local governments or otherwise have Federalism implications, the requirements of E.O. 13132 are not applicable.

Executive Order 13771, titled “Reducing Regulation and Controlling Regulatory Costs,” was issued on

January 30, 2017. It has been determined that this notice is a transfer rule and is not a regulatory action for the purposes of Executive Order 13771.

A. Alternatives Considered

The methodologies for determining the states’ fiscal year DSH allotments and IMD DSH limits, as reflected in this notice, were established in accordance with the methodologies and formula for determining states’ allotments and limits as specified in statute. This notice does not put forward any further discretionary administrative policies for determining such allotments and limits, or otherwise.

B. Accounting Statement

As required by OMB Circular A–4 (available at <http://www.whitehouse.gov/omb/circulars/a004/a-4.pdf>), in Table 1, we have prepared an accounting statement showing the classification of the estimated expenditures associated with the provisions of this notice. Table 1 provides our best estimate of the change (decrease) in the federal share of states’ Medicaid DSH payments resulting from the application of the provisions of the Medicaid statute relating to the calculation of states’ FY DSH allotments and the increase in the FY DSH allotments from FY 2017 to FY 2018.

Title: Healthy Marriage and Responsible Fatherhood performance measures and additional data collection (part of the Fatherhood and Marriage Local Evaluation and Cross-Site (FaMLE Cross-Site) Project)—Extension.

OMB No.: 0970-0460.

Description*Background*

For decades various organizations and agencies have been developing and operating programs to strengthen families through healthy marriage and relationship education and responsible fatherhood programming. The Administration for Children and Families (ACF), Office of Family Assistance (OFA), has had administrative responsibility for federal funding of such programs since 2006 through the Healthy Marriage (HM) and Responsible Fatherhood (RF) Grant Programs. The authorizing legislation for the programs may be found in Section 403(a)(2) of the Social Security Act [1].

Extension of Current Approval

The Offices of Family Assistance (OFA) and Planning, Research and Evaluation (OPRE) in the Administration for Children and Families (ACF), U.S. Department of Health and Human Services (HHS) are proposing to extend performance measure and other data collection

activities, in service to the HM and RF programs. This data collection is part of the Fatherhood and Marriage Local Evaluation and Cross-Site (FaMLE Cross-Site) project, whose purpose is to support high quality data collection, strengthen local evaluations, and conduct cross-site analysis for the Responsible Fatherhood and Healthy Marriage grantees.

ACF is requesting comment on the following data collection, which has been ongoing under OMB #0970-0460 since 2016. There are no changes proposed to the information collection, we are only requesting an extension to continue data collection with the current grantees for another three years.

Performance measures. ACF is proposing to extend collection of a set of performance measures that are collected by all grantees. These measures collect standardized information in the following areas:

- Applicant characteristics;
- Program operations (including program characteristics and service delivery); and
- Participant outcomes:
 - Entrance survey, with four versions: (1) Healthy Marriage Program Pre-Program Survey for Adult-Focused Programs; (2) Healthy Marriage Program Pre-Program Survey for Youth-Focused Programs; (3) Responsible Fatherhood Program Pre-Program Survey for Community-Based-Fathers; and (4) Responsible Fatherhood Program Pre-Program Survey for Incarcerated Fathers.
 - Exit survey, with four versions: (1) Healthy Marriage Program Post-Program Survey for Adult-Focused Programs; (2) Healthy Marriage Program Post-Program Survey for Youth-Focused Programs; (3) Responsible Fatherhood Program Post-Program Survey for Community-Based-Fathers; and (4) Responsible Fatherhood Program Post-Program Survey for Incarcerated Fathers.

These measures were developed per extensive review of the research literature and grantees' past measures.

Grantees are required to submit data on these standardized measures on a regular basis (e.g., quarterly). In addition to the performance measures mention above, ACF proposes to extend collection for these data submissions:

- Semi-annual Performance Progress Report (PPR), with two versions: (1) Performance Progress Report for Healthy Marriage Programs, and (2) Performance Progress Report for Responsible Fatherhood Programs; and
- Quarterly Performance Report (QPR), with two versions: (1) Quarterly Performance Progress Report for Healthy Marriage Programs, and (2) Quarterly Performance Progress Report for Responsible Fatherhood Programs.

A management information system has been implemented which improves efficiency and the quality of data, and makes reporting easier.

Additional data collection. We also seek to extend the approval to collect information from a sub-set of grantees on how they designed and implemented their programs (information on outcomes associated with programs will also be assessed), per the following protocols:

- Staff interview protocol on program design (will be collected from about half of all grantees);
- Staff interview protocols on program implementation (will be collected from about 20 grantees); and
- Program participant focus group protocol (will be conducted with about 20 grantees).

Respondents: Responsible Fatherhood and Healthy Marriage Program grantees (e.g., grantee staff) and program applicants and participants—participants are called “clients.”
