

Recovery Plan

The ultimate recovery goal is to remove the coquí llanero from the Federal List of Endangered and Threatened Wildlife (delist) at 50 CFR 17.11(h) by ensuring the long-term viability of the species in the wild. In the recovery plan, we define the following reasonable delisting criteria based on the best available information on the species. These criteria will be reevaluated as new information becomes available:

1. Three viable * coquí llanero populations demonstrate stable or increasing population trends (addresses Listing Factors A and E).

2. Habitat for three viable coquí llanero populations is protected in perpetuity through a conservation mechanism (e.g., land acquisition, conservation easements) (addresses Listing Factor A).

3. Threats and causes of decline have been reduced or eliminated to a degree that the coquí llanero does not need protection under the Act (e.g., developing management plans, public awareness and education) (addresses Listing Factor A and E).

* The term “viable” is defined in the draft recovery plan.
