

the maximum extent practicable, a balanced representation of viewpoints among the individuals on each SRG.

Expertise Solicited

For the Atlantic SRG (including waters off the Atlantic coast, Gulf of Mexico, and U.S. Territories in the Caribbean), NMFS seeks individuals with expertise in one or more of the following priority areas (not in order of priority): Acoustics methodology and anthropogenic effects of sound on cetaceans; line-transect methodology, mark-recapture methods and survey design, and quantitative ecology; Gulf of Mexico/southeast U.S. bottlenose dolphin population dynamics; and manatees. Additional areas of expertise areas include marine mammal bycatch reduction, Caribbean marine mammal species, and genetics.

For the Pacific SRG (including waters off the Pacific coast, Hawaiian Islands and the U.S. Territories in the Central and Western Pacific), NMFS seeks individuals with expertise in one or more of the following areas (not in order of priority): Marine mammal stock definition and assessment under the MMPA and ESA; abundance estimation, especially distance sampling and mark-recapture methods and survey design; West Coast and Alaska fishing gear/techniques; West Coast pinnipeds, including assessment, life history, ecology, and human-pinniped interactions; large whales, particularly with regard to entanglement issues; ocean health and veterinary expertise, especially relative to disease and habitat change; fisheries oceanography and ecology, particularly decadal and long-term understanding; quantitative ecology, population dynamics, modeling, and statistics, especially as related to abundance and bycatch estimation, Bayesian methods, applications of new technologies, and methods for data-limited circumstances; State, Tribal, or regional/local fishery and/or marine mammal entanglement issues in the Pacific Islands and West Coast states; sea otters; science-management interface, such as management approaches with imperfect data; and interdisciplinary skills combining different fields of research.

For the Alaska SRG, NMFS seeks individuals with expertise in one or more of the following areas, in order of priority: The Alaska commercial fishing industry and commercial fishery methods/gear, particularly fisheries with marine mammal bycatch interactions; population dynamics, modeling, and statistics; and abundance estimation, especially distance sampling and mark-recapture methods and survey

design; and knowledge of the MMPA and processing of marine mammal stock assessments.

Submitting a Nomination

Nominations for new members should be sent to Dr. Shannon Bettridge in the NMFS Office of Protected Resources (see **ADDRESSES**) and must be received by August 15, 2018. Nominations should be accompanied by the individual's curriculum vitae and detailed information regarding how the recommended person meets the minimum selection criteria for SRG members (see below). Nominations should also include the nominee's name, address, telephone number, and email address. Self-nominations are acceptable.

Selection Criteria

Although the MMPA does not explicitly prohibit Federal employees from serving as SRG members, NMFS interprets MMPA section 117(d)'s reference to the SRGs as "independent" bodies that are exempt from Federal Advisory Committee Act requirements to mean that SRGs are intended to augment existing Federal expertise and are not composed of Federal employees or contractors. Therefore, NMFS will not consider any nominee who is currently a Federal employee or a full-time contractor supporting a Federal agency.

When reviewing nominations, NMFS, in consultation with the U.S. Fish and Wildlife Service, will consider the following six criteria:

- (1) Ability to make time available for the purposes of the SRG;
- (2) Knowledge of the species (or closely related species) of marine mammals in the SRG's region;
- (3) Scientific or technical achievement in a relevant discipline, particularly the areas of expertise identified above, to be considered an expert peer reviewer for the topic;
- (4) Demonstrated experience working effectively on teams;
- (5) Expertise relevant to current and expected needs of the SRG, in particular, expertise required to provide adequate review and knowledgeable feedback on current or developing stock assessment issues, techniques, etc. In practice, this means that each member should have expertise in more than one topic as the species and scientific issues discussed in SRG meetings are diverse; and
- (6) No conflict of interest with respect to their duties as a member of the SRG.

Next Steps

Following review, nominees who are identified by NMFS as potential new members must be vetted and cleared in accordance with Department of Commerce policy. NMFS will contact these individuals and ask them to provide written confirmation that they are not registered Federal lobbyists or registered foreign agents, and to complete a confidential financial disclosure form, which will be reviewed by the Ethics Law and Programs Division within the U.S. Department of Commerce's Office of General Counsel. All nominees will be notified of a selection decision in advance of the 2019 SRG meetings.

Needs and Uses: Through the Office of Economic Adjustment (OEA), Department of Defense (DoD) funds are provided to communities for economic adjustment planning in response to closures and realignments of military installations. A measure of program evaluation is the monitoring of civilian job creation, and the type of redevelopment at former military installations. The respondents to the annual survey will generally be a single point of contact at the local level that is responsible for overseeing the base redevelopment effort. If this data is not collected, OEA will have no accurate, timely information regarding the civilian reuse of former military bases. As the administrator of the Defense Economic Adjustment Program, OEA has a responsibility to encourage private sector use of lands and buildings to generate jobs as military activity diminishes, and to serve as a clearinghouse for reuse data.
