SUPPLEMENTARY INFORMATION: Three natural coho stocks (Queets coho, Strait of Juan de Fuca coho, and Snohomish coho) and two Chinook stocks (Sacramento River fall Chinook and Klamath River fall Chinook) were found to meet the criteria for being classified as overfished in the PPMC Review of 2017 Ocean Salmon Fisheries. Under the tenets of the Salmon Fishery Management Plan (FMP), the STT is required to develop a salmon rebuilding plan for each of these stocks and propose them to the Council within one year.

The STT will meet with tribal, state, and other management entities who are working together to develop the salmon rebuilding plans. These meetings will focus on progress made since the June 2018 meetings, and on additional analysis needed for plan development. Topics for discussion may include, but are not limited to, outstanding data needs, data analysis, and potential alternatives to rebuild the stocks. One meeting will occur for each of the five stocks; additional meetings will be scheduled as needed. These meetings are open to the public. All meetings will have the same webinar ID and access code.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during these meetings. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.
