

data for a market from 20 traders to some larger number of traders?

8. If the data in the COT reports are made subject to further, and finer, distinctions, should the reports be revised for all commodities, or only for those physical commodity markets in which non-traditional commercials participate?

9. If a non-traditional commercial category were added to markets in physical commodities, what should be done with financial commodities, where "non-traditional commercials" would be essentially an empty category (since, in financial commodities, swap dealers would fall within the pre-existing "commercial" category)?

10. The Commission has observed that the non-traditional commercials tend to be long only and tend not to shift their futures positions dramatically—even in the face of substantial price movements. If the data in the COT reports are made subject to further, and finer, distinctions, would issuing the additional data on a periodic basis, in the form of a quarterly or monthly supplement, be sufficient?

11. Some reportable traders engage in both traditional (physical) and non-traditional (financial) commercial activity in the same commodity market. If the data in the COT reports are made subject to further, and finer, distinctions, such traders would have to break out their non-traditional commercial OTC hedging activity into a separate account. Would such a requirement represent an undue burden to those traders?

Issued in Washington, DC, on June 15, 2006, by the Commission.

Eileen Donovan,

Acting Secretary of the Commission.
