In the interest of security, NIH has instituted stringent procedures for entrance onto the NIH campus. All visitor vehicles, including taxicabs, hotel, and airport shuttles will be inspected before being allowed on campus. Visitors will be asked to show one form of identification (for example, a government-issued photo ID, driver's license, or passport) and to state the purpose of their visit.

Information is also available on the Institute's/Center's home page: <http://www.nlm.nih.gov/od/bor/bor.html>, where an agenda and any additional information for the meeting will be posted when available. DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (240) 276-1243.

Proposed Project: National Evaluation of the Comprehensive Community Mental Health Services for Children and Their Families Program: Phase V—New

The Substance Abuse and Mental Health Services Administration (SAMHSA), Center of Mental Health is responsible for the national evaluation of the Comprehensive Community Mental Health Services for Children and Their Families Program that will collect data on child mental health outcomes, family life, and service system development and performance. Data will be collected on 25 service systems, and roughly 7,864 children and families.

The data collection for this evaluation will be conducted over a 5-year period. The core of service system data will be collected every 18 to 24 months throughout the 5-year evaluation period, with a sustainability survey conducted in selected years. Service delivery and system variables of interest include the following: maturity of system of care development, adherence to the system of care program model, and client service experience. The length of time that individual families will participate in the study ranges from 18 to 36

months depending on when they enter the evaluation. Child and family outcomes of interest will be collected at intake and during subsequent follow-up interviews at 6-month intervals. Client service experience information is collected at these follow-up interviews. Measures included in an outcome interview are determined by the type of assessment (intake or follow-up), child's age, and whether the respondent is the caregiver or a youth.

The outcome measures include the following: child symptomatology and functioning, family functioning, material resources, and caregiver strain. The caregiver interview package includes the Caregiver Information Questionnaire, Child Behavior Checklist, Behavioral and Emotional Rating Scale (BERS), Education Questionnaire, Columbia Impairment Questionnaire, Living Situations Questionnaire, Family Life Questionnaire, and Caregiver Strain Questionnaire (caregivers of children under age 6 complete the Vineland Screener to assess development, and do not complete the BERS) at intake, and also complete the Multi-service Sector Contacts Form, Culturally Competence and Service Provision Questionnaire and the Youth Services Survey (a national outcome measurement tool). The Youth Interview package includes the Youth Information Questionnaire, Revised Children's Manifest Anxiety Scale, Reynolds Depression Scale, BERS (youth version), Delinquency Survey, Substance Use Survey, GAIN-Quick: Substance Dependence Scale, and Youth Services Survey (youth version).

In addition, the evaluation will include two special studies: (1) An evidence-based practices study will examine provider use of evidence-based practices, community readiness and implementation of evidence-based practices, and consumer experience with these practices; (2) A cultural and linguistic competence study will examine the extent to which the cultural and linguistic characteristics of communities influence program implementation and provider adaptation of evidence-based treatments, and provider service delivery decisions based on provider culture and language. The national evaluation measures address the national outcome measures for mental health programs as currently established by SAMHSA.

Internet-based technology will be used for data entry and management, and for collecting data using Web-based surveys. The average annual respondent burden with detail provided about burden contributed by specific measures
