

initial and ongoing compliance with the regulation. Records of such measurements and actions are to be retained two years on-site of the required total five years. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 419 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:

Owners or operators of integrated iron and steel manufacturing facilities.

Estimated Number of Respondents: 18.

Frequency of Response: On occasion, semiannually, and initially.

Estimated Total Annual Hour Burden: 18,421.

Estimated Total Annual Cost: \$67,000, includes O&M costs only.

Changes in the Estimates: The increase from 4,772 hours to 18,421 hours in the annual labor burden to industry from the most recently approved ICR is due to adjustments. The increase in burden from the most recently approved ICR is due to the assumption that respondents are in full compliance with the rule's periodic requirements since the compliance date of the rule passed. The active ICR burden calculation was based on the assumption that a subset of the respondents (i.e., 6 of a total of 18 sources each year) would be implementing the initial rule requirements over the three year period of the ICR, and would not have to comply with the rule on-going requirements since the compliance date for the rule was not due until 3 years after rule promulgation.

The increase from \$64,000 to \$67,000 in the total annualized capital and

operations and maintenance (O&M) costs is due to the assumption that respondents are in full compliance with the rule on-going requirements, as mentioned above. Even when there are no capital and startup costs for this ICR, the costs for operation and maintenance for baghouses and continuous capacity monitors increased significantly since we are accounting such costs for all three years of this ICR.

Title: Notification of Chemical Exports—TSCA Section 12(b).

ICR Numbers: EPA ICR Number 0795.12, OMB Control Number 2070–0030.

ICR Status: This is a request to renew an existing approved collection. This ICR is scheduled to expire on August 31, 2006. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: Section 12(b)(2) of the Toxic Substances Control Act (TSCA) requires that any person who exports or intends to export to a foreign country a chemical substance or mixture that is regulated under TSCA sections 4, 5, 6 and/or 7 submit to EPA notification of such export or intent to export. Upon receipt of notification, EPA will advise the government of the importing country of the U.S. regulatory action with respect to that substance. EPA uses the information obtained from the submitter via this collection to advise the government of the importing country.

Responses to the collection of information are mandatory (see 40 CFR part 707). Respondents may claim all or part of a notice as CBI. EPA will disclose information that is covered by a CBI claim only to the extent permitted by, and in accordance with, the procedures in 40 CFR part 2.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register**, are listed in 40 CFR part 9 and included on the related collection instrument or form, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 0.878 hours per response. Burden means the total time, effort or financial resources expended by persons to generate, maintain, retain or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install and utilize technology and systems for the purposes of collecting, validating and verifying information, processing and

maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Entities potentially affected by this action are companies that export from the United States to foreign countries, or that engage in wholesale sales of, chemical substances or mixtures.

Frequency of Collection: Annual.

Estimated Average Number of Responses for Each Respondent: 25.

Estimated Number of Respondents: 350.

Estimated Total Annual Burden on Respondents: 7,550 hours.

Estimated Total Annual Costs: \$382,130.

Changes in Burden Estimates: This request reflects an increase of 100 hours (from 7,450 hours to 7,550 hours) in the total estimated respondent burden from that currently in the OMB inventory. This increase represents the net effect of an increase in the estimated number of notices sent to EPA and a decrease in the number of firms sending notices, based on EPA's recent experiences with TSCA section 12(b) notices. This increase is an adjustment.
