Fish and Wildlife Service

Marin Islands National Wildlife Refuge Draft Comprehensive Conservation Plan and Environmental Assessment

AGENCY: Fish and Wildlife Service,
Interior.

ACTION: Notice of availability; request
for comments.

SUMMARY: The U.S. Fish and Wildlife
Service (Service) announces that the
Marin Islands National Wildlife Refuge
(Refuge) Draft Comprehensive
Conservation Plan and Environmental
Assessment (Draft CCP/EA) is available
for review and comment. Also available
for review with the Draft CCP/EA are
the draft compatibility determinations
for research and monitoring; wildlife
observation and photography;
environmental education and
interpretive guided tours; and sport
fishing.

DATES: To ensure that the Service has
adequate time to evaluate and
incorporate suggestions and other input
into the planning process, comments
should be received on or before August
21, 2006.

ADDRESSES: For information on
obtaining documents and submitting
comments, see "Review and Comment"
under **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT:
Christy Smith, Refuge Manager, (707)
769-4200, or Winnie Chan, Refuge
Planner, (510) 792-0222.

SUPPLEMENTARY INFORMATION: The Draft
CCP/EA was prepared pursuant to the
National Wildlife Refuge System
Administration Act of 1966, as amended
by the National Wildlife Refuge System
Improvement Act of 1997 (16 U.S.C.
668dd *et seq.*) (Improvement Act), and
the National Environmental Policy Act
of 1969, as amended, and describes how
the Service proposes to manage this
Refuge over the next 15 years. Refuge
management changes proposed in the
draft CCP include: Restoration of coastal
scrub and oak woodland habitats;
opportunities for public use including
wildlife observation, photography,
interpretation, and environmental
education; and cultural resource
interpretation and preservation.

The National Wildlife System
Administration Act of 1966, as amended
by the National Wildlife Refuge
Improvement Act of 1997, requires the
Service to develop a CCP for each
National Wildlife Refuge. The purpose
in developing a CCP is to provide refuge
managers with a 15-year strategy for

achieving refuge purposes and
contributing toward the mission of the
National Wildlife Refuge System,
consistent with sound principles of fish
and wildlife management, conservation,
legal mandates, and Service policies. In
addition to outlining broad management
direction on conserving wildlife and
their habitats, the CCP identifies
wildlife-dependent recreational
opportunities available to the public,
which can include opportunities for
hunting, fishing, wildlife observation
and photography, and environmental
education and interpretation.

Background

The Refuge is located off the shoreline
of the City of San Rafael, Marin County,
in San Pablo Bay. The 339-acre Refuge
of tidelands and 2 islands was
established in 1992 "for the
development, advancement,
management, conservation, and
protection of fish and wildlife
resources". The various parcels of land
within the Refuge are under the
ownership of the California Department
of Fish and Game, California State
Lands Commission, or the Fish and
Wildlife Service. The California
Department of Fish and Game-owned
lands are designated as a State
Ecological Reserve. These lands and the
Service-owned lands are designated and
administered as the Marin Islands
National Wildlife Refuge. The Service
provides day-to-day management of the

entire Marin Islands Refuge and State Ecological Reserve under the National Wildlife Refuge System Administration Act, as amended, and pursuant to a memorandum of understanding with other landowning agencies.

The Refuge supports one of the largest heron and egret colonies in northern California. The primary purpose of the Refuge is "to protect an important existing egret and heron rookery on West Marin Island and to increase colonial nesting bird use on East Marin Islands," as described in the 1992 Environmental Assessment.

Proposed Action

The Proposed Action is to provide an integrated set of management actions consistent with the purposes for which the Refuge was established; the mandates of the Refuge System; and the vision, goals, and objectives defined in the CCP. The CCP identifies the Refuge's roles in support of the mission of the Refuge System and describes the Service's proposed management actions. The CCP must be consistent with sound principles of fish and wildlife science and conservation, and legal mandates and Service policies. In addition to outlining refuge management direction for conserving wildlife and their habitats, CCPs identify wildlife-dependent recreational opportunities available to the public.

Alternatives

The Draft CCP/EA identifies and evaluates 3 alternatives for managing Marin Islands National Wildlife Refuge for the next 15 years. Each alternative describes a combination of wildlife, habitat, and public use management prescriptions designed to achieve Refuge purposes. Of the alternatives described below, the Service believes Alternative C would best achieve the purposes of the Refuge, and is, therefore identified as the Preferred Alternative.

Alternative A, the no-action alternative, assumes no change from current management programs and is considered the baseline to compare other alternatives. Under this alternative, the focus of the Refuge would be to continue to maintain and restore native coastal scrub and oak woodland habitat for migratory birds. The Refuge would remain closed to the public other than existing, supervised volunteer opportunities and fishing in the Refuge's submerged area. Wildlife observation and photography would not be allowed on the Refuge's islands.

Alternative B would accelerate habitat restoration of the coastal scrub and oak woodland habitat to provide potential habitat for the migratory birds that nest

at the Refuge. The Refuge would remain closed to public access under this Alternative, but fishing from boats would continue. Impacts from trespassing would be reduced through increased law enforcement monitoring. Raven predation of the heron and egret colonies would be monitored to determine declines in the colonies' population.

Alternative C, the preferred alternative, would also include accelerated habitat restoration, increased law enforcement monitoring, fishing from boats, and raven predation monitoring. In addition, public use, environmental education, and cultural resource preservation would be provided. Guided tours would be established to provide wildlife observation, environmental education, and cultural resource interpretation opportunities. Off-refuge environmental education opportunities include school and community presentations. Cultural resources on the Refuge will be assessed and preserved according to regulatory requirements.

Public Comments

After the review and comment period ends for this Draft CCP/EA, comments will be analyzed by the Service and addressed in the Final CCP/EA. All comments received from individuals, including names and addresses, become part of the official public record and may be released. Requests for such comments will be handled in accordance with the Freedom of Information Act, the Council on Environmental Quality's NEPA regulations, and Service and Departmental policies and procedures.

Ken McDermond,

Acting Manager, California/Nevada Operations Office, Sacramento, California.
