[Project No. 13318–003]

Swan Lake North Hydro LLC; Notice of Availability of the Draft Environmental Impact Statement for the Swan Lake North Pumped Storage Project and Intention To Hold Public Meeting

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380, the Office of Energy Projects has reviewed the application for license for the Swan Lake North Pumped Storage Hydroelectric Project, located about 11 miles northeast of Klamath Falls in Klamath County, Oregon, and has prepared a draft Environmental Impact Statement (EIS) for the project. The project would occupy 730 acres of federal lands administered by the U.S. Bureau of Land Management and the U.S. Bureau of Reclamation, state lands, and private lands.

The draft EIS contains the staff's analysis of the potential environmental impacts of the project and concludes that licensing the project, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

A copy of the draft EIS is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's website at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document.
