EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: WaterSense is a voluntary program designed to create self-sustaining markets for water-efficient products and services via a common label. The program provides incentives for manufacturers and builders to design, produce, and market water-efficient products and homes. The program also encourages consumers and commercial and institutional purchasers of water-using products and systems to choose water-efficient products and use water-efficient practices.

As part of strategic planning efforts, EPA encourages programs to develop meaningful performance measures, set ambitious targets, and link budget expenditures to results. Data collected under this ICR will assist WaterSense in demonstrating results and carrying out evaluation efforts to ensure continual program improvement. In addition, the data will help EPA estimate water and energy savings and inform future product categories and specifications.

All shipment and sales data submitted by WaterSense manufacturer and retailer/distributor partners are collected as confidential business information (CBI) using the procedures outlined in the WaterSense CBI security plan under the Clean Water Act.

Consumer Awareness Survey

- *Survey form—6100-X2*

Respondents/affected entities:

Respondents will consist of WaterSense partners and participants in the consumer survey. WaterSense partners include product manufacturers; professional certifying organizations; retailers; distributors; utilities; federal, state, and local governments; home builders; licensed certification providers; and non-governmental organizations (NGOs).

Respondent's obligation to respond: Voluntary.

Estimated number of respondents: EPA estimates the total number of respondents (over 3 years) to be 2,561.

Frequency of response: Once a prospective partner organization reviews WaterSense materials and decides to join the program, it will submit the appropriate Partnership Agreement for its partnership category (this form is only submitted once). Professional Certifying Organizations must include additional documentation to begin their partnership by completing an Application for Professional Certifying Organization Approval (this form is only submitted once). Each year, EPA also asks partners to submit an Annual Reporting Form and Awards Application (voluntarily at the partner's discretion). Licensed certification providers for WaterSense-labeled new homes are asked to submit a Provider Quarterly Reporting Form four times each year. EPA also may conduct two Consumer Awareness Surveys over the three-year period of the ICR.

Total estimated burden: 6,830 hours (per year for both respondents and EPA). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$598,527 (per year for both respondents and EPA), includes \$1,578 annualized capital or operation & maintenance costs.

Changes in Estimates: There is a decrease of 2,096 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to changes in program requirements including using online forms for all non-CBI related data, discontinuing the individual irrigation partner category, and simplifying the quarterly provider reporting requirements, which have reduced operation & maintenance costs and lowered the estimated burden. EPA also better understands how long it takes partners to complete program forms and has better historical data to project new partners/forms over the next three years.

Dated: August 17, 2018.

Andrew D. Sawyers,
Director, Office of Wastewater Management.
