

of concurrence. Applications from One-Stop Career Centers without a letter of concurrence from the One-Stop Career Center partners will be considered non-responsive. One-Stop Career Center applications must specify one or more community college(s) where all capacity building and training activities will occur under the grant.

On page 37955, Section III(C), in the first column, is corrected to add:

7. Re-designation of One-Stop Operators. If at any time, the applicant One-Stop Operator changes, then the One-Stop partners may amend their application, on behalf of the One-Stop Career Center, for the purpose of designating a new One-Stop Operator.

SUPPLEMENTARY INFORMATION:

(1) Clarification of the Intent of Behind the Requirement That a Component of All Applications Be Direct Training Costs That Allow Participants, Without Tuition Payments, To Be Enrolled in the Training Program (71 FR 37948 (July 3, 2006) pages 37954.)

ETA's intent with this condition is that grantees do not "double dip" by charging tuition AND direct training costs from the grant for the same enrollee. It is ETA's expectation that the grant will cover the direct training costs for a substantive number of targeted students and that those students would not be charged tuition. Grantees must identify and track the number of individuals trained using grant dollars as well as the number of individuals trained using leveraged resources.

The SGA requires that each project include a component of direct training. Traditionally, institutions of higher education charge a per-credit hour tuition to cover these costs. ETA intends that students participating in the direct training component of the project not be required to pay costs already covered by the grant. Applicants may recoup the costs of the direct training component in two ways: (1) charging the grant the normal tuition rate for the course or (2) charging the actual direct and indirect costs of the course. If the applicants choose to recoup the costs through tuition charged to the grant, they may also charge the grant for the non-tuition costs of attending the course such as lab fees or books.

For the targeted number of students to be trained with leveraged resources, direct training may be leveraged with Department of Education PELL grants, WIA training funds, and other cash sources. Also, these leveraged resources may also cover the non-tuition costs of attending the course such as lab fees or books.

In addition, the capacity building component of the grant may enable students beyond those targeted for training under the grant to access training at the college. The college may charge those students tuition. In these instances, applicants should estimate the impact of this capacity building activity by projecting the numbers of students that will be trained in addition to those targeted for training under the grant and/or leveraged resources.

For reference, direct training costs are the costs associated with the actual provision of a training course as opposed to the capacity building costs associated with the development of training capabilities or curriculums. Direct training costs may include (please note that this is not an exhaustive list):

- Faculty costs, including salaries and fringe benefits
- In-house training staff
- Support staff costs such as lab or teaching assistants
- Classroom space, including laboratories, mock-ups or other facilities used for training purposes
- Books, materials, and supplies used in the training course, including specialized equipment used in the training course

Direct training costs do not include costs that support the college in general, but not the training program, such as fees to support student activities, the library, gym or recreation center, etc, which may be covered through some other mechanism, such as student fees. Indirect training costs may include the applicable share of the Institution's indirect costs (overhead) and library or other student activity fees associated with the operation of the Institution. Both direct and indirect training costs must be allowable costs under the applicable OMB circular. All direct and indirect training costs should be linked to a specific course or curriculum as specified in the proposal or the statement of work.

(2) Clarification of Intent Behind the 5 Bonus Points for Leveraging Workforce Investment Act Resources (71 FR 37948 (July 3, 2006), pages 37951 and 37958.)

The application currently states: "Applications that demonstrate the use of Workforce Investment Act (WIA) funds for Individual Training Accounts, the pilot of Career Advancement Accounts, or for customized training to cover the tuition costs for the CBJTG training program for eligible new or incumbent workers, will receive 5 bonus points," 71 FR 37948 (July 3, 2006). ETA's intent behind this criterion is to award bonus points to applications

that demonstrate integration of WIA training funds into grant activities. Examples of WIA training funds include Individual Training Accounts, customized training, and Career Advancement Accounts. Applications that demonstrate the use of WIA training funds, whether through ITAs, customized training, or CAAs, will receive 5 bonus points. This does not change what is allowed for applications to receive bonus points, but is a clarification of the intent of bonus points being for use of WIA training funds generally, not just ITA's, CAA's, or customized training, to cover the tuition costs for eligible new or incumbent workers.

Career Advancement Accounts (CAAs) have been proposed in the President's Fiscal Year 2007 budget; however ETA recognizes that some states may be piloting CAAs in advance of the FY 2007 budget, which is why they are included in the list of programs utilizing WIA training funds.

Dated: August 2, 2006.

Signed at Washington, DC, this 2nd day of August, 2006.

Laura P. Watson,

Division Chief, Division of Federal Assistance.

BILLING CODE 4510-30-P

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Records Schedules; Availability and Request for Comments

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes notice at least once monthly of certain Federal agency requests for records disposition authority (records schedules). Once approved by NARA, records schedules provide mandatory instructions on what happens to records when no longer needed for current Government business. They authorize the preservation of records of continuing value in the National Archives of the United States and the destruction, after a specified period, of records lacking administrative, legal, research, or other value. Notice is published for records schedules in which agencies propose to destroy records not previously authorized for disposal or reduce the retention period of records already authorized for

disposal. NARA invites public comments on such records schedules, as required by 44 U.S.C. 3303a(a).

DATES: Requests for copies must be received in writing on or before September 18, 2006. Once the appraisal of the records is completed, NARA will send a copy of the schedule. NARA staff usually prepare appraisal memorandums that contain additional information concerning the records covered by a proposed schedule. These, too, may be requested and will be provided once the appraisal is completed. Requesters will be given 30 days to submit comments.

ADDRESSES: You may request a copy of any records schedule identified in this notice by contacting the Life Cycle Management Division (NWML) using one of the following means:

Mail: NARA (NWML), 8601 Adelphi Road, College Park, MD 20740-6001.

E-mail: requestschedule@nara.gov.

FAX: 301-837-3698.

Requesters must cite the control number, which appears in parentheses after the name of the agency which submitted the schedule, and must provide a mailing address. Those who desire appraisal reports should so indicate in their request.

FOR FURTHER INFORMATION CONTACT:

Laurence Brewer, Director, Life Cycle Management Division (NWML), National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740-6001. Telephone: 301-837-1539. E-mail: records.mgt@nara.gov.

SUPPLEMENTARY INFORMATION: Each year Federal agencies create billions of records on paper, film, magnetic tape, and other media. To control this accumulation, agency records managers prepare schedules proposing retention periods for records and submit these schedules for NARA's approval, using the Standard Form (SF) 115, Request for Records Disposition Authority. These schedules provide for the timely transfer into the National Archives of historically valuable records and authorize the disposal of all other records after the agency no longer needs them to conduct its business. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. Most schedules, however, cover records of only one office or program or a few series of records. Many of these update previously approved schedules, and some include records proposed as permanent.

No Federal records are authorized for destruction without the approval of the Archivist of the United States. This

approval is granted only after a thorough consideration of their administrative use by the agency of origin, the rights of the Government and of private persons directly affected by the Government's activities, and whether or not they have historical or other value.

Besides identifying the Federal agencies and any subdivisions requesting disposition authority, this public notice lists the organizational unit(s) accumulating the records or indicates agency-wide applicability in the case of schedules that cover records that may be accumulated throughout an agency. This notice provides the control number assigned to each schedule, the total number of schedule items, and the number of temporary items (the records proposed for destruction). It also includes a brief description of the temporary records. The records schedule itself contains a full description of the records at the file unit level as well as their disposition. If NARA staff has prepared an appraisal memorandum for the schedule, it too includes information about the records. Further information about the disposition process is available on request.

Schedules Pending

1. Department of Agriculture, Agricultural Marketing Service (N1-136-05-1, 6 items, 6 temporary items). Inputs, master files, documentation, and electronic mail and word processing copies associated with an electronic information system used to collect and monitor trading practices in the marketing of fresh and frozen fruits and vegetables in interstate and foreign commerce in accordance with the Perishable Agricultural Commodities Act. This schedule authorizes the agency to apply the proposed disposition instructions to any recordkeeping medium.

2. Department of Agriculture, Agricultural Marketing Service (N1-136-05-3, 4 items, 4 temporary items). Inputs, outputs, master files, and documentation associated with an electronic information system used to maintain and track fruit and vegetable inspection and certification data. This schedule authorizes the agency to apply the proposed disposition instructions to any recordkeeping medium.

3. Department of Agriculture, Agricultural Marketing Service (N1-136-05-8, 5 items, 5 temporary items). Inputs, outputs, master files, and documentation associated with an electronic information system used by the National Science Laboratory to evaluate, retain, and report analytical

test data for agricultural commodities. This schedule authorizes the agency to apply the proposed disposition instructions to any recordkeeping medium.

4. Department of Agriculture, Agricultural Marketing Service (N1-136-06-8, 6 items, 6 temporary items). Inputs, outputs, master files, documentation, and electronic mail and word processing copies associated with an electronic information system used to collect price information on agricultural commodities in specific markets and marketing areas. This schedule authorizes the agency to apply the proposed disposition instructions to any recordkeeping medium.

5. Department of the Army, Agency-wide (N1-AU-06-5, 3 items, 3 temporary items). Records relating to the Army Oil Analysis Program and Product Quality Deficiency Program. Included are such records as oil analysis requests and feedback reports, and deficient product descriptions, findings, and recommendations. Also included are electronic copies of records created using electronic mail and word processing. This schedule authorizes the agency to apply the proposed disposition instructions to any recordkeeping medium.

6. Department of the Army, Agency-wide (N1-AU-06-7, 2 items, 2 temporary items). Records relating to waivers for applicants not meeting enlistment standards for the Regular Army and the Army Reserves, including requests, recommendations, and various forms used to collect background information. Also included are electronic copies of records created using electronic mail and word processing. This schedule authorizes the agency to apply the proposed disposition instructions to any recordkeeping medium.

7. Department of Commerce, National Oceanic and Atmospheric Administration (N1-370-06-3, 5 items, 5 temporary items). Records of the National Marine Fisheries Service, including eligible and ineligible applicant files for dedicated access permits under the individual fishing quota program, and registered buyer/receiver permits. Also included are electronic copies of records created using electronic mail and word processing.

8. Department of Housing and Urban Development, Office of Faith-Based and Community Initiatives (N1-207-06-1, 9 items, 2 temporary items). Working papers, and spreadsheet data used for reporting the number of faith-based organizations receiving agency funding. Proposed for permanent retention are

recordkeeping copies of program publications, program planning and project files, correspondence, regulatory and policy affairs files, and documents relating to program liaison activities with agency staff and interaction with the White House Office of Faith-Based and Community Initiatives.

9. Department of Interior, Office of the Secretary (N1-48-06-3, 6 items, 3 temporary items). Files maintained by Deputy Assistant Secretaries and records lacking historical value held by other senior agency officials. Also included are electronic copies of records created using electronic mail and word processing. Proposed for permanent retention are recordkeeping copies of files maintained by the Secretary and the Secretary's Counselors, Deputy Secretary, Assistant Secretaries, Solicitor, and Inspector General.

10. Department of Justice, Justice Management Division (N1-60-06-1, 3 items, 2 temporary items). Electronic copies of records created using electronic mail and word processing relating to agency whistleblower cases and the Office of Attorney Recruitment and Management's handling of those cases. Proposed for permanent retention are recordkeeping copies of whistleblower protection case files.

11. Department of Justice, Federal Bureau of Investigation (N1-65-06-10, 1 item, 1 temporary item). Consent forms for contractor personnel agreeing to warrantless physical searches of their offices or workplaces within agency facilities.

12. Department of the Treasury, Internal Revenue Service (N1-58-06-10, 1 item, 1 temporary item). Records of the Office of Appeals relating to appraisal review requests for art and cultural property listed in tax returns. Records include copies of taxpayer case files consisting of forms, work papers, recommendations and final appraisal reports. This schedule reduces the retention period for recordkeeping copies of these files, which were previously approved for disposal.

Dated: July 31, 2006.

Michael J. Kurtz,

Assistant Archivist for Records Services—Washington, DC.

BILLING CODE 7515-01-P

NATIONAL SCIENCE FOUNDATION

Notice of Availability of a Draft Environmental Assessment

AGENCY: National Science Foundation.

ACTION: Notice of availability of a draft Environmental Assessment for proposed activities in the Pacific Ocean.

SUMMARY: The National Science Foundation gives notice of the availability of a draft Environmental Assessment for proposed activities in the Pacific Ocean.

The Division of Ocean Sciences in the Directorate for Geosciences (GEO/OCE) has prepared a draft Environmental Assessment for a low-energy marine seismic survey by the Research Vessel Roger Revelle in the South Pacific Ocean, in international waters roughly between 23° and 47° S, and between 115° and 165° W during December 2006–January 2007. The draft Environmental Assessment is available for public review for a 30-day period.

DATES: Comments must be submitted on or before September 5, 2006.

ADDRESSES: Copies of the draft Environmental Assessment are available upon request from: Dr. William Lang, National Science Foundation, Division of Ocean Sciences, 4201 Wilson Blvd., Suite 725, Arlington, VA 22230. Telephone: (703) 292-7857. The draft is also available on the agency's Web site at http://www.nsf.gov/geo/oce/pubs/scripps_seismic_southpac_dec2006_EA.pdf.

SUPPLEMENTARY INFORMATION: The Scripps Institution of Oceanography (SIO), with research funding from the National Science Foundation (NSF), plans to conduct a piston/gravity coring, magnetic, and seismic survey program at 12 sites in the South Pacific Ocean during December 2006–January 2007. The proposed action is part of the Integrated Ocean Drilling Program (IODP) and will collect data that will be used to (1) document the metabolic activities genetic composition, and biomass of prokaryotic communities in the seafloor sediments with very low total activity; (2) quantify the extent to which those communities may be supplied with harvestable energy by water radiolysis, a process independent of the surface photosynthetic world; and (3) survey broad characteristics of seafloor communities and habitats in this region, in order to refine the planning and objectives of IODP South Pacific research. The seismic survey is required to locate optimal piston/gravity-coring sites and involves one vessel, the R/V Roger Revelle. One pair of low-energy Generator-Injector (GI) airguns (45 in³ discharge volume each) will be used as the seismic energy source with a proposed survey program of approximately 1930 km of seismic lines, including turns, with water depths of

3200 to 5700m. The research will be carried out entirely within international waters.

Numerous species of cetaceans and sea turtles occur in the South Pacific Ocean. Several of the species are listed as Endangered under the U.S. Endangered Species Act (ESA). The increased underwater noise from the research may result in avoidance behavior by some marine animals, and other forms of disturbance. An integral part of the planned survey is a monitoring and mitigation program designed to minimize impacts of the proposed activities on marine species present, and to document the nature and extent of any effects. Injurious impacts to marine animals have not been proven to occur near equipment proposed to be used in this research; however, the planned monitoring and mitigation measures would minimize the possibility of such effects should they otherwise occur.

With the planned monitoring and mitigation measures, unavoidable impacts to each of the species of marine mammal that might be encountered are expected to be limited to short-term localized changes in behavior and distribution near the seismic vessel. At most, such effects may be interpreted as falling within the Marine Mammal Protection Act (MMPA) definition of "Level B Harassment" for those species managed by NMFS. No long-term or significant effects are expected on individual marine mammals, or the populations to which they belong, or their habitats. The agency is currently consulting with the National Marine Fisheries Service regarding species within their jurisdiction potentially affected by this proposed activity.

Copies of the draft Environmental Assessment, titled "Environmental Assessment of a Planned Low-Energy Marine Seismic Survey by the Scripps Institution of Oceanography in the South Pacific Ocean, December 2006–January 2007", are available upon request from: Dr. William Lang, National Science Foundation, Division of Ocean Sciences, 4201 Wilson Blvd., Suite 725, Arlington, VA 22230. Telephone: (703) 292-7857 or at the agency's Web site at: http://www.nsf.gov/geo/oce/pubs/scripps_seismic_southpac_dec2006_EA.pdf. The National Science Foundation invites interested members of the public to provide written comments on this draft Environmental Assessment.
