II. Background

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC is requesting public comment on its intention to request the OMB's approval for the information collection summarized in this notice.

1. *The title of the information collection*: NRC Form 664, "General Licensee Registration."
2. *OMB approval number*: 3150–0198.
3. *Type of submission*: Revision.
4. *The form number, if applicable*: NRC Form 664.

5. *How often the collection is required or requested*: Annually.

6. *Who will be required or asked to respond*: General Licensees of the NRC who possess certain generally licensed devices subject to annual registration authorized pursuant to section 31.5 of title 10 of the *Code of Federal Regulations* (10 CFR).

7. *The estimated number of annual responses*: 525.

8. *The estimated number of annual respondents*: 525.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request*: 175 hours (525 annual responses \times $\frac{1}{3}$ hour).

10. *Abstract*: NRC Form 664 is used by NRC general licensees to make reports regarding certain generally licensed devices subject to annual registration. The registration program allows NRC to better track general licensees, so that they can be contacted or inspected as necessary, and to make sure that generally licensed devices can be identified even if lost or damaged. Also, the registration program ensures that general licensees are aware of and understand the requirements for the possession, use, and disposal of devices containing byproduct material. Greater awareness helps to ensure that general licensees will comply with the regulatory requirements for proper handling and disposal of generally licensed devices and would reduce the potential for incidents that could result in unnecessary radiation exposure to the public and contamination of property.

III. Specific Requests for Comments

The NRC is seeking comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
2. Is the estimate of the burden of the information collection accurate?
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection on respondents be minimized, including the use of automated collection techniques or other forms of information technology?

Dated at Rockville, Maryland, this 4th day of September 2018.

For the Nuclear Regulatory Commission.

David C. Cullison,

NRC Clearance Officer, Office of the Chief Information Officer.
