

Distribution, or Use. We have determined that it is not a "significant energy action" under that order because it is not a "significant regulatory action" under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The Administrator of the Office of Information and Regulatory Affairs has not designated it as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Technical Standards

The National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This proposed rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

Environment

We have analyzed this proposed rule under Commandant Instruction M16475.ID, which guides the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have made a preliminary determination that there are no factors in this case that would limit the use of a categorical exclusion under section 2.B.2 of the Instruction. Therefore, we believe that this rule should be categorically excluded, under figure 2–1, paragraph (34)(g), of the Instruction, from further environmental documentation.

A preliminary "Environmental Analysis Check List" is available in the docket where indicated under **ADDRESSES**. Comments on this section will be considered before we make the final decision on whether this rule should be categorically excluded from further environmental review.

SUPPLEMENTARY INFORMATION:

A. Background

The internet protocol is one of the primary mechanisms that define how and where information moves across networks, *e.g.*, voice, video, and text. Currently Internet Protocol Version 4 (IPv4) is the industry standard used and has about 4.3 billion address spaces. Key characteristics of IPv6 are designed to significantly increase internet address space, promote flexibility and functionality, and enhance security. Agencies can reduce costly upgrades and the complexity of transitioning to IPv6 by proactively integrating IPv6 requirements into Federal contracts.

On August 2, 2005, OMB issued a memo (Memorandum M-05-22, *Transition Planning for Internet Protocol Version 6 (IPv6)*) giving guidance to agencies to transition from IPv4 to IPv6, and required agencies to implement full use of IPv6 in network backbones by June 2008. OMB further requires, to the maximum extent practicable, all new IT procurements include IPv6 capable products and systems. Any exceptions to the use of IPv6 will require advance written approval from the agency CIO.

This rule proposes amending the FAR by—

1. Adding a new paragraph (A)(2) in FAR 7.105 (b)(4)(ii) to ensure agency planners comply with the Internet Protocol Version 6 (IPv6) capability requirements as a part of acquisition planning;

2. Adding paragraph (e) to FAR 12.202 to state that requirements documents for information technology shall include Internet Protocol Version 6 (IPv6) capable products and services; and

3. Adding paragraph (e) to FAR 39.101 to state when acquiring information technology, agencies shall include the appropriate requirements for Internet Protocol Version 6 (IPv6) capable products and services, and for agencies to establish procedures for granting exceptions.

This is not a significant regulatory action and, therefore, was not subject to review under Section 6(b) of Executive Order 12866, Regulatory Planning and Review, dated September 30, 1993. This

rule is not a major rule under 5 U.S.C. 804.

B. Regulatory Flexibility Act

The Councils do not expect this proposed rule to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because IPv6 requires use of commercially available products, and no new standards or testing is required. An Initial Regulatory Flexibility Analysis has, therefore, not been performed. We invite comments from small businesses and other interested parties. The Councils will consider comments from small entities concerning the affected FAR Parts 7, 12, and 39 in accordance with 5 U.S.C. 610. Interested parties must submit such comments separately and should cite 5 U.S.C. 601, *et seq.* (FAR case 2005-041), in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the proposed changes to the FAR do not impose information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*
