

and 1.1 percentage points for total response), and more specifically, in areas where there is a high concentration of non-White and Hispanic populations. Moreover, the response to the bilingual form resulted in a higher proportion of Hispanic persons than the English-only form. However, item nonresponse rates for the bilingual form were higher for all household level items and Hispanic origin compared to the English-only form. There are many potential reasons for these item nonresponse discrepancies, including forms design, question wording, translation, and differences in the responding population.

The purpose of the 2007 CBiFS is to determine if the item nonresponse issues can be resolved by improved form design and utilization of the questions that will be on the form in the 2008 Census Dress Rehearsal. Moreover, this study provides the opportunity to analyze the impact of the bilingual form in areas that contain a heavy concentration of Spanish-speaking people with limited English proficiency. Additionally, this study will provide the opportunity to verify the 2005 NCT finding of increased response to the bilingual census form.

II. Method of Collection

This study will include two experimental bilingual form panels, and one control panel. Each panel will have the same questionnaire content (i.e., the content selected for dress rehearsal). The control panel will be the English-only form. The two experimental panels will contain variations of the bilingual form design to try to improve on the design that was used in the 2005 NCT. The first experimental panel will be the bilingual form that will be used in the dress rehearsal. The second experimental panel will contain an experimental format alternative to the first panel. We expect to mail each form to roughly 10,000 housing units, for a total of 30,000 housing units in the study.

In early April 2007, the Census Bureau will mail an advance letter to every housing unit in this study. The advance letter will explain why we are conducting the 2007 CBiFS. The letter also will inform households that they will soon receive a request to complete a questionnaire. The advance letter for the two bilingual panels will have a dual language design.

The second mailing will be the initial questionnaire package. Housing units will receive a paper questionnaire and a first-class postage-paid return envelope. Included in the mailing

package will be a letter from the Census Bureau's Director that encourages households to respond. Households selected for the bilingual panels will receive one of the bilingual questionnaires, and households selected for the control panel will receive the English form. Respondents will be asked to mail back their completed questionnaire by Census Day, May 1, 2007.

The third mailing will be a reminder mailing. The reminder mailing asks households to respond to the census test if they have not already done so. The reminder mailing will be an English-only postcard for the control panel and a letter for the bilingual panels since the Spanish translation requires more space than is available on the postcard.

Beginning May 2007, a replacement questionnaire will be sent to all housing units that have not responded by a pre-determined date. Accompanying the questionnaire will be a letter from the Census Bureau's Director urging response. The replacement questionnaire will be the English form for all panels, including the bilingual panels.

There will be no field follow-up for the 2007 CBiFS.

Foreign-Trade Zones Board

Scope Clarification Request—Foreign-Trade Subzone 122K (Alumina Production) Sherwin Alumina Company—Gregory, TX

A request for clarification of scope has been submitted to the Foreign-Trade Zones Board (the Board) by Sherwin Alumina Company (Sherwin), operator of Foreign-Trade Subzone 122K. A grant of authority for Sherwin's subzone was issued on December 30, 1988, for the manufacture of alumina and aluminum hydrate. In its original application, Sherwin indicated that its foreign-sourced input would be bauxite, imported duty-free under subheading 2606.00 of the Harmonized Tariff Schedule of the United States (HTSUS), to be used in the production of alumina and aluminum hydrate.

Sherwin now seeks clarification as to whether its scope includes authority to further refine 24,500 metric tons of the bauxite into smaller particles of aluminum hydrate than is currently being produced. There will be no increase in imports of bauxite used in the refining process nor in total production of alumina at the Sherwin plant as a result of the new manufacturing activity.

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary at the address listed below. The closing period for their receipt is September 29, 2006. A copy of the request is available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 1115, 1401 Constitution Ave., NW., Washington, DC 20230.

Dated: August 23, 2006.

Andrew McGilvray,

Acting Executive Secretary.
