I. Licenses To Be Offered in Auction No. 69

1. In Auction No. 69, two 3-megahertz blocks, each consisting of a pair of 1.5 megahertz segments in the 1392-1395 MHz and 1432-1435 MHz bands, will be offered in each of six regions known as Economic Area Groupings (EAGs).

Additionally, one 2-megahertz block of unpaired spectrum in the 1390-1392 MHz band will be offered in each of 52 geographic areas known as Major Economic Areas (MEAs). The licenses available in Auction No. 69 are also listed in Attachment A of the *Auction No. 69 Comment Public Notice*.

2. *Permissible Services.* When adopting its service rules for these bands, the Commission established a flexible regulatory and licensing framework in order to promote the provision of new and technologically innovative services. Licensees may provide both fixed and mobile services including wireless internet, high speed data as well as advanced two-way mobile and paging services.

3. International Coordination.

Currently, the United States does not have international agreements with Canada and Mexico governing operations in the 1392-1395 MHz, 1432-1435 MHz or the 1390-1392 MHz bands. Licensees in these bands operating near the borders must protect stations in Canada and Mexico from harmful interference. The Bureau also notes that operation in these bands may be subject to future agreements with Canada and Mexico and therefore may be subject to further modification.

4. *Incumbency Issues.* Potential applicants are advised that there are several government operations that will continue to operate in these bands:

All other government operations, except for medical telemetry (1395-1400 MHz), will operate on a non-interference basis to authorized non-Government operations and shall not hinder implementation of any non-Government operations.

1392-1395 MHz and 1432-1435 MHz

Government operations authorized as of March 22, 1995, at the 17 sites will continue to operate on a fully protected basis until January 1, 2009. All other government operations, except for medical telemetry (1395-1400 MHz), will operate on a non-interference basis to authorized non-Government operations and shall not hinder implementation of any non-Government operations.
