

Economic Impacts of this Proposed Action

The proposed 9-percent quota increase could have a small benefit to the fishing industry due to the increased TAL and thus, the additional opportunity to harvest tilefish. In general, there is not a direct relationship between the amount of fish landed and the price, but if one did assume a direct relationship, then the 2005 average price per pound of \$2.48 would be worth an additional \$448,332 per year for the 180,779 lb (82 mt) increase in tilefish quota proposed under this action. Using the 2005 price per pound, this could potentially amount to an additional \$2 million over the 5 years remaining in the rebuilding period. However, because of the accounting error that resulted in the quota being monitored as landed (gutted) weight rather than live (whole) weight, as the FMP specified between November 1, 2001, and May 2005, the expected revenue increase would only be applicable for the period after the accounting error was corrected. The correction of the accounting error equates to a 9-percent reduction in available tilefish quota.

Economic Impacts of Alternatives to the Proposed Action

The Council analyzed two tilefish quota alternatives in addition to the preferred alternative. The alternatives are as follows: The preferred alternative of a 9-percent increase in TAL; a second alternative representing a 5-percent increase in TAL; and a third alternative representing the no-action alternative (status quo). The second alternative could have a small benefit to the fishing industry, as potentially as much as 99,208 lb (45 mt) more landings of tilefish could occur due to the increase in quota. As stated previously, there is not a direct relationship between the amount of fish landed and the price, but if one did assume a direct relationship, then the 2005 average price per pound of \$2.48 would be worth an additional \$248,000 per year for the additional 99,208 lb (45 mt) increase in the quota under this alternative. Using the 2005 price per pound, this would represent a potential \$1.24-million increase in ex-vessel price over the 5 years remaining in the rebuilding period. This increase would be applicable for the period after the accounting error was corrected in May 2005.

The third alternative would maintain the status quo (since May 2005) quota for the remainder of the stock rebuilding period. Implementation of the third alternative would be expected to

maintain status quo conditions for rebuilding the resource and result in no changes to tilefish fishing revenues since May 2005. However, if viewed over the entire period since the implementation of the FMP (November 1, 2001), the tilefish industry average revenues could decline under the status quo alternative, since they would no longer be permitted to harvest at the level experienced prior to the correction of the accounting error.

Reporting and Recordkeeping Requirements

This proposed rule would not impose any new reporting, recordkeeping, or other compliance requirements. Therefore, the costs of compliance would remain unchanged.

RIN 0648-AQ87

Magnuson-Stevens Fishery Conservation and Management Act Provisions; Fisheries of the Northeastern United States; Atlantic Herring Fishery; Amendment 1 to the Atlantic Herring Fishery Management Plan

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of Availability of a fishery management plan amendment; request for comments.

SUMMARY: NMFS announces that the New England Fishery Management Council (Council) has submitted Amendment 1 to the Atlantic Herring Fishery Management Plan (FMP) (Amendment 1), incorporating the draft Final Supplemental Environmental Impact Statement (FSEIS), Regulatory Impact Review (RIR), and the Initial Regulatory Flexibility Analysis (IRFA), for Secretarial review and is requesting comments from the public. The proposed measures include: A limited

access program; an open access incidental catch permit; a change in the management area boundaries; establishment of a purse seine/fixed gear-only area; establishment of a Maximum Sustainable Yield (MSY) proxy; an approach to determining the distribution of area-specific total allowable catches (TACs); a multi-year specifications process; a research quota set-aside for herring-related research; set-asides for fixed gear fisheries; a change in the midwater trawl gear definition; and additional measures that could be implemented through the framework adjustment process. The intent of this action is to provide efficient management of the Atlantic herring fishery and to meet conservation objectives.

DATES: Comments must be received on or before November 6, 2006.

ADDRESSES: Written comments on the proposed rule may be sent by any of the following methods:

Mail to Patricia A. Kurkul, Regional Administrator, NMFS, Northeast Regional Office, One Blackburn Drive, Gloucester, MA 01930. Mark the outside of the envelope "Comments Herring Amendment 1";

Fax to Patricia A. Kurkul (978) 281-9135;

E-mail to the following address: HerrAmend1@noaa.gov. Include in the subject line of the e-mail comment the following document identifier: "Comments Herring Amendment 1."

Electronically through the Federal e-Rulemaking portal: <http://www.regulations.gov>.

Copies of Amendment 1, the draft FSEIS, RIR, and the IRFA are available from Paul J. Howard, Executive Director, New England Fishery Management Council, 50 Water Street, Newburyport, MA 01950. These documents are also available online at <http://www.nefmc.org>.

FOR FURTHER INFORMATION CONTACT: Eric Jay Dolin, Fishery Policy Analyst, 978-281-9259, fax 978-281-9135, e-mail eric.dolin@noaa.gov.

SUPPLEMENTARY INFORMATION: The notice of availability for the Draft Supplemental Environmental Impact Statement (DSEIS), which analyzed the impacts of all of the measures under consideration in Amendment 1 and Framework 43 to the Northeast Multispecies Fishery Management Plan (Northeast Multispecies FMP), was published on September 9, 2005 (70 FR 53657), with public comment accepted through October 24, 2005. Public hearings were held in October 2005, in six locations from Maine to New Jersey.

At its January 31–February 2, 2006, meeting, the Council voted to adopt Amendment 1 for submission to NMFS, and submitted the document and associated analyses on May 3, 2006.

The primary purpose of Amendment 1 is to modify the management program for the Atlantic herring fishery by implementing a limited access program to better match the capacity of the fleet to the resource. The Amendment is also intended to modify other management measures so that the Atlantic herring resource is managed more efficiently and sustainably.

In July 1999, the Council voted to develop a limited or controlled access program for the herring fishery, and NMFS, at the request of the Council, established September 16, 1999 (FR 64 50266), as a control date for the Atlantic herring fishery in Federal waters. Scoping meetings for an amendment to the FMP were conducted in February 2000, shortly after completion of the FMP, with public hearings taking place during that month in Maine, Massachusetts, Rhode Island, and New Jersey. In April 2003, the Council re-initiated scoping, holding public hearings in April and May of that year in Maine, Massachusetts, and New Jersey.

During the development of Amendment 1, both as a result of issues raised by the Council and by the public during scoping, a variety of elements were added to Amendment 1, all of

which are intended to improve the management of the fishery and contribute to the sustainability of the stock. These include an open access incidental catch permit; a change in the management area boundaries; establishment of a purse seine/fixed gear-only area; establishment of an MSY proxy; an approach to determining the distribution of area-specific TACs; a multi-year specifications process; a research quota set-aside for herring-related research; a set-aside for fixed gear fisheries; measures to address bycatch of multispecies in the herring fishery; a change in the midwater trawl gear definition; and additional measures that could be implemented through the framework adjustment process.

At its final meeting for Amendment 1, the Council separated the measures to address bycatch in the herring fishery from Amendment 1, and agreed to submit these measures separately as Framework 43 to the NE Multispecies FMP. The measures contained in Framework 43 were included in the DSEIS and public hearing document for Amendment 1 to the Atlantic Herring FMP (Amendment 1). The Council voted on February 2, 2006, to adopt the measures in Amendment 1 and Framework 43, but to submit Framework 43 in advance of Amendment 1 in order to establish measures for the fishery as soon as possible during the 2006 summer fishing season. The final rule for

Framework 43 was published in the **Federal Register** on August 15, 2006 (71 FR 46871).

Public comments are being solicited on Amendment 1 and its incorporated documents through the end of the comment period stated in this notice of availability. A proposed rule that would implement Amendment 1 may be published in the **Federal Register** for public comment, following NMFS's evaluation of the proposed rule under the procedures of the Magnuson-Stevens Act. Public comments on the proposed rule must be received by the end of the comment period provided in this notice of availability of Amendment 1 to be considered in the approval/disapproval decision on the amendment. All comments received by November 6, 2006, whether specifically directed to Amendment 1 or the proposed rule, will be considered in the approval/disapproval decision on Amendment 1. To be considered, comments must be received by close of business on the last day of the comment period; that does not mean postmarked or otherwise transmitted by that date.

Authority: 16 U.S.C. 1801 *et seq.*
