

sandhills habitat occupied by the species. Take would be associated with the demolition of a single-family home and construction of two duet homes on a parcel legally described as Assessor Parcel Number: 022-172-47. The current site address is 22 Blake Lane in Scotts Valley, Santa Cruz County, California. The applicant is requesting a permit for take of Mount Hermon June beetle that would result from "covered activities" that are related to the demolition of a single-family home and construction of two duet homes at 22 Blake Lane.

The applicant proposes to avoid, minimize, and mitigate take of Mount Hermon June beetle associated with the covered activities by fully implementing the HCP. The following measures will be implemented: (1) Locating the project on a developed parcel where habitat is more degraded relative to intact habitat; (2) Avoiding the flight season, if possible, and using plastic sheeting or other soil-covering material to prevent Mount Hermon June beetles from burrowing into exposed soil in the construction site when/if soil disturbing activities must occur between May and August; (3) Having a qualified biologist translocate any larval beetles unearthed during construction activities to a portion of the project site outside of the impact area that supports intact vegetation; (4) Minimizing hardscaping associated with the project, and using native Sandhills plants and non-invasive ornamental plants in landscape areas; (5) Minimizing removal of native trees on the site, including the ponderosa pines and coast live oaks; (6) Revegetating areas of temporary habitat disturbance with native and non-invasive ornamental plants that do not degrade Mount Hermon June beetle habitat; and (7) Securing off-site mitigation at a ratio of 1:1 to mitigate for habitat impacts through the acquisition of 0.32 ac (14,031 sf) of conservation credits at the Zayante Sandhills Conservation Bank. The applicant will fund all elements of the proposed conservation strategy to ensure implementation of all minimization measures, monitoring, and reporting requirements identified in the HCP.

Our Preliminary Determination

The Service has made a preliminary determination that issuance of the incidental take permit is neither a major Federal action that will significantly affect the quality of the human environment within the meaning of section 102(2)(C) of NEPA (42 U.S.C. 4321 *et seq.*) nor that it will, individually or cumulatively, have more than a negligible effect on the Mount

Hermon June beetle, the only species covered in the HCP. Therefore, the permit qualifies for a categorical exclusion under NEPA.

Public Review

We request comments on our determination that the applicant's proposal will have a minor or negligible effect on the Mount Hermon June beetle and that the plan qualifies as a low-effect HCP. We will evaluate the permit application, including the plan and comments we receive, to determine whether the application meets the requirements of section 10(a)(1)(B) of the Act. We will use the results of our internal Service consultation, in combination with the above findings, in our final analysis to determine whether to issue the ITP. If the requirements are met, we will issue the ITP to the applicant. We will make the final permit decision no sooner than 30 days after the publication date of this notice.

If you wish to comment on the permit application, HCP, and associated documents, you may submit comments by any one of the methods in **ADDRESSES**.
