usually precludes eligibility for financial assistance in paying for private coverage. CMS and AE will use the DoD data to authenticate identity, determine eligibility for financial assistance (including an advance tax credit and cost-sharing reduction, which are types of insurance affordability programs), and determine the amount of the financial assistance.

Categories of Individuals

The categories of individuals whose information is involved in the matching program are active duty service members and their family members and retirees and their family members whose TRICARE eligibility records at DoD match data provided to DoD by CMS (submitted by AEs) about individual consumers who are applying for or are enrolled in private health insurance coverage under a qualified health plan through a federally-facilitated or state-based health insurance exchange.

Categories of Records

The categories of records used in the matching program are identity records and minimum essential coverage period records. The data elements are as follows:

A. From CMS to DoD

For each applicant or enrollee seeking an eligibility determination, CMS will submit a request file to DoD that may contain, but is not limited to, the following specified data elements in a fixed record format: Transaction ID, social security number (SSN), first name, middle name, surname, date of birth, gender, requested qualified health plan (QHP) coverage effective date, requested QHP coverage end date.

B. From DoD to CMS

For each applicant or enrollee seeking an eligibility determination, DoD will provide CMS with data indicating whether or not the individual is eligible for MEC through TRICARE during the applicable QHP coverage period. The data may contain, but is not limited to, the following specified data elements in a fixed record format: Insurance end date, person SSN identification, response code, response code text.

System(s) of Records

The records used in this matching program are disclosed from the following systems of records, as authorized by routine uses published in the System of Records Notices (SORNs) cited below:

Type of Collection: Extension on a previously approved collection.

OMB No. 0990–0313- Office of the Assistant Secretary for Health—Office of HIV/AIDS and Infectious Disease Policy (OHAIDP).

Abstract: Length of request: 3 years. The Nation Blood Collection & Utilization Survey (NBCUS) is a biennial survey of the blood collection and utilization community to produce reliable and accurate estimates of national and regional collections, utilization and safety of all blood products. The 2019 NBCUS is funded by Department of Health and Human Services (DHHS/OASH) and performed by the Centers for Disease Control and Prevention (CDC). In previous years, a similar survey was performed under the auspices of the National Blood Data Resource Center (NBDRC), a private subsidiary of AABB (formerly known as the American Association of Blood Banks), with private funding. In 2005, 2007, 2009, and 2011 the survey was funded by HHS/OS/OASH and performed under contract by AABB. The CDC has since performed the 2013, 2015, and 2017 iterations of the NBCUS.

Type of respondent: U.S. Blood Collection Centers (number sampled: 70), U.S. Hospital Blood Banks (number sampled: 2850); frequency: biennial; and the affected public: private businesses.

Estimated Annualized Burden Table

Type of respondent	Number of respondents	Number responses per respondent	Average burden per response (in hours)	Total burden hours
Hospital Blood Banks	2850	1	2	5700
