

Here, although the issues raised by the GOA may be considered in the context of an administrative review under section 751(a) of the Act, there have been no shipments which could be the subject of an administrative review. Thus, under Commerce's normal administrative review procedures, we otherwise would not have an opportunity to review the substantial changes that the GOA has made to its export tax regime, which formed the basis for certain of our findings in the *AD Final Determination* and *CVD Final Determination*. These changes, as discussed in greater detail above, include legislative decrees that significantly reduced the export tax on soybeans and other soybean products which were examined in the underlying investigations, and imposed new export taxes on biodiesel and other goods which were not previously in place at the time of the investigations. In light of the above, including the information submitted by the GOA regarding a complete cessation of shipments of biodiesel from Argentina to the United States and the unique nature of the substantial changes to the GOA's export tax regime since the imposition of the *Orders*, we find that there is sufficient information and "good cause" to initiate CCRs.

Therefore, we are initiating CCRs pursuant to sections 751(b)(1) and (4) of the Act and 19 CFR 351.216(c) and (d) to assess the impacts of the GOA's revised export tax regime on the *AD Final Determination* and *CVD Final Determination*, as discussed above.

We intend to publish in the **Federal Register** a notice of preliminary results of the AD and CVD CCRs, in accordance with 19 CFR 351.221(b)(4) and 351.221(c)(3)(i), which will set forth the factual and legal conclusions upon which our preliminary results are based, and a description of any action proposed based on these results. Pursuant to 19 CFR 351.221(b)(4), interested parties will have an opportunity to comment on the preliminary results. We will issue the final results of review no later than 270

days after publication of this notice of initiation in accordance with 19 CFR 351.216(e).

This notice is published in accordance with section 751(b)(1) and 777(i) of the Act and 19 CFR 351.221(c)(3) of the Act.

Dated: November 5, 2018.

Gary Taverman,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

APPENDIX

Scope of the Orders

The product covered by these orders is biodiesel, which is a fuel comprised of mono-alkyl esters of long chain fatty acids derived from vegetable oils or animal fats, including biologically-based waste oils or greases, and other biologically-based oil or fat sources. These orders cover biodiesel in pure form (B100), as well as fuel mixtures containing at least 99 percent biodiesel by volume (B99). For fuel mixtures containing less than 99 percent biodiesel by volume, only the biodiesel component of the mixture is covered by the scope of these order.

Biodiesel is generally produced to American Society for Testing and Materials International (ASTM) D6751 specifications, but it can also be made to other specifications. Biodiesel commonly has one of the following Chemical Abstracts Service (CAS) numbers, generally depending upon the feedstock used: 67784–80–9 (soybean oil methyl esters); 91051–34–2 (palm oil methyl esters); 91051–32–0 (palm kernel oil methyl esters); 73891–99–3 (rapeseed oil methyl esters); 61788–61–2 (tallow methyl esters); 68990–52–3 (vegetable oil methyl esters); 129828–16–6 (canola oil methyl esters); 67762–26–9 (unsaturated alkylcarboxylic acid methyl ester); or 68937–84–8 (fatty acids, C12–C18, methyl ester).

The B100 product subject to the orders is currently classifiable under subheading 3826.00.1000 of the Harmonized Tariff Schedule of the United States (HTSUS), while the B99 product is currently classifiable under HTSUS subheading 3826.00.3000. Although the HTSUS subheadings, ASTM specifications, and CAS numbers are provided for convenience and customs purposes, the written description of the scope is dispositive.
