Termination of Review of Noise Compatibility Program for Fresno Yosemite International Airport, Fresno, CA

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces it has terminated its review of the noise compatibility program, at the request of the city of Fresno, owner and operator of Fresno Yosemite International Airport, under the provisions of 49 U.S.C. 47501 *et. seq.* (the Aviation Safety and Noise Abatement Act, hereinafter referred to as "the Act") and 14 CFR part 150.

DATES: *Effective Date:* The effective date of the FAA's termination of its review of the Fresno Yosemite International Airport Noise Compatibility Program is September 15, 2006.

FOR FURTHER INFORMATION CONTACT:

Camille Garibaldi, Environmental Protection Specialist, San Francisco Airports District Office, Airports Division, Western-Pacific Region, Federal Aviation Administration, 831 Mitten Road, Burlingame, California, 94010. Telephone: 650/876–2778, extension 613.

SUPPLEMENTARY INFORMATION: On July 6, 2005 (70 FR 50437-50438), the FAA determined that the noise exposure maps submitted by the City of Fresno were in compliance with applicable requirements under 14 CFR part 150. Subsequently, the City of Fresno submitted its noise compatibility program for the subject airport to the FAA for formal FAA review that began on May 26, 2006 (71 FR 33032-33033). In a letter received by FAA on September 15, 2006, the City of Fresno requested that FAA suspend its review and processing of the noise compatibility program in order to modify the document. When the FAA has received the revised documentation, FAA will reissue appropriate notice establishing new review and approval periods in accordance with section 150.33(e) of 14 CFR part 150.

Questions may be directed to the individual named above under the heading: FOR FURTHER INFORMATION CONTACT.

Issued in Hawthorne, California on September 15, 2006. **Mark A. McClardy,** *Manager, Airports Division, Western-Pacific Region, AWP–600.*

SUPPLEMENTARY INFORMATION:

Background

FLNG requested a waiver of compliance from the regulatory requirement at 49 CFR 193.2301. This regulation requires each LNG facility constructed after March 31, 2000, to comply with 49 CFR part 193 and paragraph 4.2.1 in NFPA 59A, 2001 Edition.

NFPA 59A requires that welded containers designed for not more than 15 pounds per square inch gauge (psig) comply with the Eighth Edition, 1990, of the American Petroleum Institute standard 620, *Design and Construction of Large, Welded, Low-Pressure Storage Tanks (Appendix Q).* The Eighth Edition of API 620 requires inspection according to Appendix Q, which calls for the full radiographic examination of all vertical and horizontal butt welds associated with the container.

FLNG is proposing to use the 2002 Tenth Edition, Addendum 1, of API 620. The Tenth Edition, Addendum 1, of API 620, allows for ultrasonic examination, instead of radiography, as an acceptable alternative to examining butt welds associated with the container. FLNG proposes to use ultrasonic examination which consists of full semi-automated and manual ultrasonic examination using shear wave probes. The examination also consists of a volumetric ultrasonic examination using a combination of creep wave probes and focused angled longitudinal wave probes.

FLNG asserts that ultrasonic examination has several advantages over radiographic examination, namely it:

• Produces faster examination rates with equal reliability;

• Yields higher weld productivity rates and overall lower project cost;

• Employs a linear scanning process and allows both sides of the weld to be examined simultaneously;

• Offers results reviewable by personnel both on-site and off-site;

• Utilizes inspection data which can be stored, analyzed, and shared digitally; and
