* TCS is an administrative records survey that collected between Fiscal Years (FY) 2007–2011 total compensation, teacher status, and demographic data about all teachers from multiple States.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system consists of responses from students, their parents or legal guardians, teachers, administrators, service providers, and other adults to data collection instruments including information such as background and demographic data, functional measures (reports of children's functioning in cognitive, social, emotional, and physical domains), family characteristics, education and/or employment experiences, finances, aspirations, plans, and attitudes. Cognitive assessment scores, administrative and financial aid records, and high school and college transcripts are also appended to the records. The appended administrative records contain data such as attendance, program participation, and other information.

The records for service providers, schools/institutions, and local educational agencies contain information on numbers and characteristics of students, teaching staff, and administrators; data on facilities, programs, services, and finances; and information related to student enrollment, persistence, completion, and performance. The records related to teachers and administrators contain, in addition to

the above, data on certifications, training, experience, staff evaluations, salary, benefits, and attitudes and opinions related to various aspects of education and operations.

RECORD SOURCE CATEGORIES:

Information in the records comes from responses to survey and assessment instruments and from administrative records maintained by K–12 schools and school districts, postsecondary institutions, the Department, and third-parties, including State and Federal agencies, as well as vendors, such as the National Student Clearinghouse (NSC).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

The Department may disclose information contained in a record in this system of records under the routine uses listed in this system of records without the consent of the individual if the disclosure is compatible with the purpose for which the record was collected. Any disclosure of individually identifiable information from a record in this system must also comply with the requirements of Section 183 of the ESRA (20 U.S.C. 9573) and its confidentiality standards that apply to all collection, reporting, and publication of data by NCES. Any disclosure of personally identifiable information (PII) from students' education records that were obtained from schools, school districts, postsecondary institutions, and other sources must also comply with the requirements of the Individuals with Disabilities Education Act (IDEA) (20 U.S.C. 1417(c); 34 CFR 300.610–300.611, 300.613–300.623, and 300.625–300.627) and the Family Educational Rights and Privacy Act (20 U.S.C. 1232g; 34 CFR part 99), which protect the privacy of student education records and the PII contained therein.

(1) *Contract Disclosure.* When NCES contracts with a private firm for the purpose of collating, analyzing, aggregating, maintaining, appending, or otherwise refining records in this system, the Commissioner of Education Statistics may release relevant records to the contractor. The contractor must agree to safeguards to protect the security and confidentiality of the records disclosed from this system, consistent with Section 183 of the ESRA (20 U.S.C. 9573).

(2) *Research Disclosure.* Where the Commissioner of Education Statistics determines that an individual or organization is qualified to carry out specific research, the Commissioner may disclose information from the

system of records to that researcher solely for the purpose of carrying out that research. Directly personally identifiable respondent information, such as name and contact information, are stored separately from the rest of the data collected in this system, and are not made available as part of a research disclosure. The researcher must agree to safeguards to protect the security and confidentiality of the records disclosed from this system, consistent with Section 183 of the ESRA (20 U.S.C. 9573). Furthermore, the researcher must agree to use the information for statistical purposes only, not redisclose any data in identifiable form, and permit NCES' periodic inspection.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records are maintained in a database on NCES' or its contractors' or subcontractors' secure servers and in other secure electronic storage media. Directly personally identifiable respondent information, such as name and contact information, is stored separately from the rest of the data collected in this system.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records in the location file are indexed by a unique number assigned to each individual, which can be cross-referenced when needed with the separately stored direct personal identifiers. Records are retrieved by title of survey and the unique number.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

The Department shall submit a retention and disposition schedule that covers the records contained in this system to the National Archives and Records Administration (NARA) for review. The records will not be destroyed until such time as NARA approves said schedule.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Access to the records is limited to authorized personnel who are briefed regarding confidentiality of the data, are required to sign a written statement attesting to their understanding of the significance of the confidentiality requirement and penalties for non-compliance, and have received Department security clearances.

All physical access to the NCES, contractor, and subcontractor sites where this system of records is maintained, is controlled and monitored by security personnel who check each individual entering the buildings for his or her employee or visitor badge.

The computer systems employed offer a high degree of resistance to tampering and circumvention. Security systems limit data access to contract staff on a "need to know" basis, and control each individual user's ability to access and alter records within the system.

The NCES, contractor, and subcontractor employees who "maintain" (including collect, maintain, use, or disseminate) data in this system of records must comply with the requirements of the confidentiality standards under Section 183 of the ESRA (20 U.S.C. 9573).

You must provide necessary particulars such as the study in question, your name, current address, the date and place of your birth, and any other identifying information requested by the Department, while processing the request, to distinguish between individuals with the same name.
