

review of listed species at least once every five years. On the basis of such reviews under section 4(c)(2)(B), we determine whether or not any species should be removed from the List (delisted), or reclassified from endangered to threatened or from threatened to endangered. Delisting a species must be supported by the best scientific and commercial data available and only considered if such data substantiates that the species is neither endangered nor threatened for one or more of the following reasons: (1) the species is considered extinct; (2) the species is considered to be recovered; and/or (3) the original data available when the species was listed, or the interpretation of such data, were in error. Any change in Federal classification would require a separate rulemaking process. The regulations in 50 CFR 424.21 require that we publish a notice in the **Federal Register** announcing those species currently under active review. This notice announces our active review of Johnson's seagrass, currently listed as threatened.

Public Solicitation of New Information

To ensure that the 5-year review is complete and based on the best available scientific and commercial information, we are soliciting new information from the public, concerned governmental agencies, Tribes, the scientific community, industry, environmental entities, and any other interested parties concerning the status of Johnson's seagrass.

The 5-year review considers the best scientific and commercial data and all new information that has become available since the listing determination or most recent status review. Categories of requested information include (1) species biology including, but not limited to, population trends, distribution, abundance, demographics, and genetics; (2) habitat conditions including, but not limited to, amount, distribution, and suitability; (3) conservation measures that have been implemented that benefit the species; (4) status and trends of threats; and (5) other new information, data, or corrections including, but not limited to, taxonomic or nomenclatural changes, identification of erroneous information contained in the List, and improved analytical methods.

If you wish to provide information for this 5-year review, you may submit your information and materials to Shelley Norton (see **ADDRESSES**). Our practice is to make submissions of information, including names and home addresses of respondents, available for

public review during regular business hours. Respondents may request that we withhold a respondent's identity, as allowable by law. If you wish us to withhold your name or address, you must state this request prominently at the beginning of your submission. We will not, however, consider anonymous submissions. To the extent consistent with applicable law, we will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public inspection in their entirety. Information and materials received will be available for public inspection, by appointment, during normal business hours (see **ADDRESSES** section).

Background: AmeriCorps grants are generally awarded to eligible organizations to recruit, train, and manage AmeriCorps members who address unmet community needs.

AmeriCorps members are individuals who engage in community service. Members may receive a living allowance during their term of service. Upon successful completion of their service members receive an education award from the National Service Trust.

Roughly three quarters of all AmeriCorps grant funding goes to Governor-appointed state service commissions which award subgrants to nonprofit organizations in their states. The AmeriCorps Application Instructions: State Competitive and State Education Award Program, are used by applicants interested in these programs. The application is completed electronically using eGrants, the Corporation's Web-based grants management system.

Current Action: The Corporation seeks to separate the current application instructions into two separate sets of instructions in order to increase clarity and ease of use. The application will be used in the same manner as the existing application. The Corporation also seeks to continue using the current application instructions until the revised application instructions are approved by the Office of Management and Budget (OMB). The current application instructions are due to expire on April 30, 2009.
