Title: Community Water System Survey 2006.

ICR numbers: EPA ICR No. 2232.01, OMB Control No. 2040—new.

ICR Status: This ICR is for a new information collection activity. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Last conducted in 2001, the Community Water System Survey is conducted about every 5 years to gather information on the operating and financial characteristics of a nationally representative sample of community water systems. The agency uses the data provided by this survey to meet its Regulatory Impact Analysis obligations under EO 12866 and its obligations to assess and mitigate regulatory impacts on small entities under the Regulatory Flexibility Act and the Small Business Regulatory Enforcement Fairness Act. Also, under Section 1412(b)(3)(C) of the Safe Drinking Water Act, the Agency must prepare a Health Risk Reduction and Cost Analysis for any proposed National Primary Drinking Water Regulation. Through this survey EPA seeks to gather information on community drinking water system finances, as well as infrastructure characteristics that bear on both present costs and future cost impacts, including current treatment, storage and

distribution system configurations, to help inform the Agency's determination of baseline conditions for effective economic analysis. In addition, the survey will provide a limited amount of information to help the agency better conduct its outreach efforts to assist the regulated community and gauge the effectiveness of current program initiatives in the area of water security. This is a one-time collection effort. Responses are voluntary and are not required in order to obtain or retain any benefit. The Agency does not intend to share or make public the names or identities of survey participants.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average one to five hours per response, depending on the size of the water system sampled. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Investor-owned water systems (SIC 4941) and publicly owned water systems (SIC 9511).

Estimated Number of Respondents: 1,692.

Frequency of Response: Once.

Estimated Total Annual Hour Burden: 6,060 (respondents); 300 (States).

Estimated Total Annual Cost: \$191,693 (respondents); \$10,830 (States), includes \$0 annualized capital or O&M costs.

Dated: October 11, 2006.

Title: NSPS for the Phosphate Fertilizer Industry (Renewal).

ICR Numbers: EPA ICR Number 1061.10; OMB Control Number 2060-0037.

ICR Status: This is a request to renew an existing approved collection that is scheduled to expire on November 30, 2006. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or

sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The NSPS for the Phosphate Fertilizer Industry, published at 40 CFR part 60, subparts T, U, V, W, and X, were proposed on October 22, 1974, and promulgated on August 6, 1975. These standards apply to each wet-process phosphoric acid plant, each superphosphoric acid plant, each granular diammonium phosphate plant, and each triple superphosphate plant, having a design capacity of more than 15 tons of equivalent phosphorous pentoxide (P₂O₅) feed per calendar day. These standards also apply to granular triple superphosphate storage facilities.

Owners or operators of affected facilities described must make the following one-time-only initial notifications and reports on the results of the initial performance test. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. The owners or operators must install, calibrate, maintain, and operate a monitoring device which continuously measures and permanently records the total pressure drop across the scrubbing system.

Semiannual reports are required. The owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least two years following the date of such measurements. Responses to the collection of information are mandatory and are being collected to assure compliance with 40 CFR part 60, subparts T, U, V, W, and X. These notifications, reports and records are essential in determining compliance.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 46 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Phosphate Fertilizer Industry.

Estimated Number of Respondents: 13.

Frequency of Response: Initial and Semiannual.

Estimated Total Annual Hour Burden: 1,194 hours.

Estimated Total Annual Cost: \$388,363, which includes \$0 annual Start Up costs, \$320,190 annualized operations & maintenance (O&M) costs, and \$68,173 annualized labor costs.

Changes in the Estimates: There is no change of hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. It is determined that the number of respondents subject to the rules addressed by this ICR is 13, with no additional new sources expected over the three-year period of this ICR.

Dated: October 10, 2006.
