

Identify, obtain, and organize information on advertising and marketing expenditures, prepare response: 15–75 hours.

Identify, obtain, and organize media placement information, prepare response: 40–160 hours.

Identify, obtain, and organize information regarding marketing policies, prepare response: 10–30 hours.

Total 80–300 hours.

Assuming that approximately 35 information requests are sent to parent companies that market a single category of product to children and adolescents, staff estimates a total burden for these companies of 3,500 hours (35 companies $\times$ 100 average burden hours per company). Assuming that approximately 15 information requests are sent to parent companies that market multiple categories of products to children and adolescents, staff estimates a total of approximately 3,150 hours (15 companies $\times$ 210 average burden hours per company). Thus, the staff's estimate of the total burden is approximately 6,650 hours. These estimates include any time spent by separately incorporated subsidiaries and other entities affiliated with the ultimate parent company that has received the information request.

3. Estimated Cost Burden

It is difficult to calculate with precision the labor costs associated with this data production, as they entail varying compensation levels of management and/or support staff among companies of different sizes. Financial, legal, marketing, and clerical personnel may be involved in the information collection process. The FTC staff has assumed that professional personnel and outside legal counsel will handle most of the tasks involved in gathering and producing responsive information, and has applied an average hourly wage of \$250/hour for their labor. Thus, the staff estimates that the total labor costs for the information requests will be \$1,662,500 ((\$250 $\times$ 3,500 hours for companies that market a single category) + (\$250 $\times$ 3,150 hours for companies that market multiple categories)).

FTC staff estimates that the capital or other non-labor costs associated with the information requests are minimal. Although the information requests may necessitate that industry members maintain the requested information provided to the Commission, they should already have in place the means

to compile and maintain business records.

Acting General Counsel.
