Frequency: Annually.

Affected Public: Individuals or household; State, local, or tribal gov't, SEAs or LEAs.

Reporting and Recordkeeping Hour Burden:

Responses: 4,889.

Burden Hours: 16,074.

Abstract: This study will implement a randomized controlled trial of a social studies curriculum that uses a problem-based instructional approaches to teach high school economics. Economics is a required course for high school graduation in California, and will be added in Arizona in 2007; the National Assessment of Educational Progress (NAEP) will test economics in 2006. The curriculum approach is intended to increase class participation and content knowledge and has been shown to differentially benefit low-achieving students. This study will target rural and urban high schools. The experimental condition requires teachers to attend a 5-day workshop in summer 2007 during which they will be provided with curriculum materials for PBE and training for using these materials. High school seniors will receive instruction from their teachers using the problem-based instructional approach. Teacher and student outcomes focus on differences in content knowledge in economics, compared to the control group.
