[Docket No. FAA-2006-25947; Airspace
Docket No. 06-AAL-31]

Proposed Revision of Class D/E Airspace; Big Delta, Allen Army Airfield, Fort Greely, AK

AGENCY: Federal Aviation
Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This action proposes to revise the controlled airspace at Allen Army Airfield (AAF), AK. The current Class D airspace is continuous. The United States Army has decided to staff the Allen AAF air traffic control tower (ATCT) part time. The Class D and E airspace will need to be revised in order to align Class D airspace effective times to match ATCT hours of operation. The current title of the airspace described in FAA Order 7400.9P will also change to reflect current guidance in FAA Order 7400.2E. Adoption of this proposal would result in reconfiguring the controlled airspace at Allen AAF, Delta Junction, AK.

DATES: Comments must be received on or before December 15, 2006.

ADDRESSES: Send comments on the proposal to the Docket Management System, U.S. Department of Transportation, Room Plaza 401, 400 Seventh Street, SW., Washington, DC 20590-0001. You must identify the docket number FAA-2006-25947/Airspace Docket No. 06-AAL-31, at the beginning of your comments. You may also submit comments on the Internet at <http://dms.dot.gov>. Persons interested in being placed on a mailing list for future NPRM's should contact the FAA's Office of Rulemaking, (202) 267-9677, to request a copy of Advisory Circular No. 11-2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

The Proposal

The FAA is considering an amendment to the Code of Federal Regulations (14 CFR Part 71), which would revise the Class D and E airspace descriptions at Allen AAF, AK resulting from a change in the hours of activation at the Allen AAF Control Tower. The intended effect of this proposal is to adjust the Class D airspace activation time to align with the Allen AAF tower hours of operation. The class D airspace would only be in place while the tower is manned. The Class D airspace area will be effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airport/Facility Directory.

The Army does not need to operate the control tower 24 hours per day. Class D airspace is only in effect when a tower is open. When the tower is not open, the airspace would revert to Class E. Additionally, the title of each airspace description in FAA Order 7400.9P associated with Allen AAF would be changed. By convention, these titles are associated with the nearest city or town. In this case, "Delta Junction" should be referenced (not "Big Delta"). For example, the Class E5 airspace should be titled: "AAL AK E5 Delta Junction, AK". There is a smaller town named Big Delta about 10 miles further north of Delta Junction. It has been mistakenly listed in the description since 1995. This action would correct that error. The proposed airspace changes are sufficient in size to contain aircraft executing instrument procedures at Allen AAF, AK.

The area would be depicted on aeronautical charts for pilot reference. The coordinates for this airspace docket are based on North American Datum 83. The Class D airspace areas designated as 700/1200 foot transition areas are published in paragraph 6005 in FAA Order 7400.9P, *Airspace Designations and Reporting Points*, dated September 1, 2006, and effective September 15, 2006, which is incorporated by reference in 14 CFR 71.1. The Class D

and E airspace designations listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA’s authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle 1, section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency’s authority.

This rulemaking is promulgated under the authority described in subtitle VII, part A, subpart 1, section 40103, Sovereignty and use of airspace. Under that section, the FAA is charged with prescribing regulations to ensure the safe and efficient use of the navigable airspace. This regulation is within the scope of that authority because it proposes changes to Class D and E airspace that remain sufficient in size to contain aircraft executing instrument procedures at Allen AAF and represents the FAA’s continuing effort to safely and efficiently use the navigable airspace.
