This notice is an invitation to interested organizations or individuals to submit their nominations for membership (no self-nominations will be accepted). The CMS Administrator will appoint new members to the APOE from among those candidates determined to have the expertise required to meet specific agency needs, and in a manner to ensure an appropriate balance of membership. We have an interest in ensuring that the interests of both women and men, members of all racial and ethnic groups, and disabled individuals are adequately represented on the APOE. Therefore, we encourage nominations of qualified candidates who can represent these interests. Any interested organization or person may nominate one or more qualified persons.

Each nomination must include a letter stating that the nominee has expressed a willingness to serve as a Panel member and must be accompanied by a curricula vitae and a brief biographical summary of the nominee's experience.

While we are looking for experts in a number of fields, our most specific needs are for experts in outreach to minority and underserved communities, health communications, disease-related advocacy, disability policy and access, health economics research, behavioral

We are requesting that all submitted curricula vitae include the following:

In order to permit an evaluation of possible sources of conflict of interest, potential candidates will be asked to provide detailed information concerning such matters as financial holdings, consultancies, and research grants or contracts.

Members are invited to serve for 2-year terms, contingent upon the renewal of the APOE by appropriate action prior to its termination. A member may serve after the expiration of that member's term until a successor takes office. Any member appointed to fill a vacancy for an unexpired term shall be appointed for the remainder of that term.

Proposed Information Collection Activity; Comment Request

Proposed Projects: Trafficking Victim Assistance Program Data Collection.

Title: Trafficking Victim Assistance Program Data Collection.

OMB No.: 0970-0467.

Description: The Trafficking Victims Protection Act of 2000 (TVPA), as amended, authorizes the Secretary of

Health and Human Services to expand benefits and services to foreign nationals in the United States who are victims of severe forms of trafficking in persons. Such benefits and services may include services to assist potential victims of trafficking (Section 107(b)(1)(B) of the TVPA, 22 U.S.C. 7105(b)(1)(B)). The Office on Trafficking in Persons (OTIP) awards cooperative agreements to organizations to provide case management services to foreign national victims of human trafficking pursuing HHS Certification and their qualified family members. The awarded organizations must provide comprehensive case management and referrals to qualified persons, either directly through its own organization or by partnering with other organizations through subcontracts or both.

Persons qualified for services under this grant are victims of a severe form of trafficking in persons who have received HHS Certification or Eligibility, potential victims of a severe form of trafficking who are actively seeking to achieve HHS Certification or Eligibility, family members with derivative T visas, and minor dependent children of foreign victims of severe forms of trafficking in persons or potential victims of trafficking.

To help measure each grant project's performance and the success of the program in assisting the target population, to assist grantees to assess and improve their projects over the course of the project period, and to fulfill instructions for a consolidated report to several committees of the House of Representatives, OTIP proposes to collect information from TVAP grantees on a monthly, quarterly, or annual basis, including participant demographics (e.g., age, sex, and country of origin), types of trafficking experienced (sex, labor, or both), types of enrollment, types of services provided, types of health screening and medical services received, the names of the entities providing medical services, the amount of money expended on each type of service provided, the amount of money expended on each type of client enrollment, types of partnerships developed through the grant, and the types of training and technical assistance provided to subrecipient organizations or other partners.

This information will help OTIP assess the project's performance in assisting foreign national victims of trafficking and will better enable TVAP grantees to meet the program objectives and to monitor and evaluate the quality of case management services provided by any subcontractors. OTIP will also include aggregate information in reports

to Congress to help inform strategies and policies to assist foreign national victims of human trafficking.

Respondents: Trafficking Victim Assistance Program Grantees.
